TABLE OF CONTENTS

	<u>Page</u>
Section A	1
Wyoming Labor Force:	
Monthly Labor Force Statistics by County, January through June, 2009	
Annual Labor Force Statistics by County, 1990 through 2008	
Section B	9
Residential Building Permits:	
Annual Building Permits, 1980 through 2008, by County	
Annual Building Permits Per Unit Valuation, 1980 through 2008, by County	
Section C	19
Housing Needs Assessment Surveys Fiscal Years 2001 through 2009:	
Wyoming Housing Needs Assessment Surveys	
Fiscal Years 2001 through 2009, by County	
Section D	69
Bureau of Economic Analysis Employment and Income:	
Employment and Real Earnings Per Job by Industry, 2003 through 2007	
Total Employment and Real Personal Income 1969 through 2007	
Section E	119
WCDA Loan Purchase Profile: 1979-2009	
Number of Loan Purchases by Fiscal Year	
Average Number of Bedrooms by Fiscal Year	
Average Number of Bathrooms by Fiscal Year	
Average Number of Square Feet by Fiscal Year	
Average Year Built by Fiscal Year	
Average Household Income by Fiscal Year	
Average Household Size by Fiscal Year	
Average Age of Homebuyer by Fiscal Year	
Average Purchase Price by Fiscal Year	
Average Appraised Value by Fiscal Year	
Average Debt to Income Ratio by Fiscal Year	
Average Loan to Value Ratio by Fiscal Year	
Percent of Home Loans that are for New Construction	
Percent of Home Loans for Married Couples	
Percent of Home Loans for Female Head of Household	
Percent of Home Loans Guaranteed by FHA	

Section F	137
Census Data:	
Decennial Census and Intercensal Population Estimates	
Section G	139
Semi-Annual Rental Vacancy Survey	
First Semi-Annual 2009 Rental Vacancy Survey Tables, by County	
Section H	147
Driver's Licenses Exchanged or Surrendered by County	
Section I	149
WCDA's Tax Credit and HOME Project Units	

SECTION A. WYOMING LABOR FORCE

Labor force data is from the Bureau of Labor Statistics (BLS) and Wyoming Department of Employment (Wyoming Labor Market Information). These data are estimated from the Current Population Survey (CPS) and have been adjusted for commuting and dual job holding. The data represent persons by place of residence and may include workers involved in Labor Management Disputes.

According to the BLS, the sum of individual items may not always equal the totals due to independent rounding off of totals and components to the nearest thousand.

SECTION B. RESIDENTIAL BUILDING PERMITS

The U.S. Census Bureau collects new, privately owned residential building permits from individual permit offices on a voluntary basis only. Geographic areas are defined by the U.S. Census Bureau. The frequency of reporting is either monthly or annual. Very few areas report monthly in Wyoming, and those that do have significant delays in reporting. Consequently, only annual data is reported herein.

According to the U.S. Census Bureau, “(a) housing unit is a house, an apartment, a group of rooms or a single room intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building and which have a direct access from the outside of the building or through a common hall. In accordance with this definition, each apartment unit in an apartment building is counted as one housing unit.” The first five tables in this section report the number of new, privately owned residential building units permitted. The next four tables report the valuation of new units permitted as reported voluntarily to the U.S. Census Bureau and expressed as real 2006 dollars, or the value of the construction with the effects of inflation eliminated from the data. It should be noted, as well, that when a permitting process does not cover an area, valuation and permit data may be underrepresented.

SECTION C. HOUSING NEEDS ASSESSMENT SURVEYS

These data are summarized from surveys administered at local Department of Transportation driver's license offices throughout Wyoming. These survey instruments are voluntary and directed to new residents of Wyoming, those individuals who come into local Department of Transportation offices to exchange their out-of-state license for a Wyoming license. Hence, the survey represents the situations, feelings and opinions of new residents to Wyoming.

Data in this section are presented as a percent distribution of all responses. These percent distributions may differ from those presented in Volume I of the *Profile*, because those narratives address a subset of all responses; e.g., *of those who are dissatisfied with their current housing*, the share of new residents who wish to own a home, or *of those that wish to rent*, the share that wish to rent for less than \$365 per month.

SECTION D. BUREAU OF ECONOMIC ANALYSIS DATA

The U.S. Bureau of Economic Analysis (BEA) employment and income data are drawn, in part, from income tax filings; hence, 2006 was the most currently available county-level data when this report was prepared.

The Office of Management and Budget (OMB) introduced the North American Industry Classification System (NAICS) to replace the Standard Industrial Classification (SIC) system.¹ The NAICS system makes it possible to compare industry statistics among international, state and local economies. NAICS groups economic activities into 21 sectors, up from the 10 divisions in the SIC system. The use of NAICS makes substantial time series breaks in most industries. Time series breaks will affect projections and comparisons of statistics over time due to differences in the two systems. One of the major differences is the structure of the NAICS taxonomy, which is based on a production-oriented, or supply-based, conceptual framework instead of an output-based framework, which characterized SIC.

Beginning with the 2001 data the BEA began using the NAICS in place of the SIC system. Since an industry-to-industry comparison to data prior to 2000 is not possible at this point in time, the employment and earnings data in this section present the latest NAICS data available for 2001 through 2005.

The following concepts are used in this section:

Employment represents jobs, not labor force (which counts people). These jobs include proprietorships, agricultural work, domestic employment and casual labor jobs.

Income data includes earnings from work as well as unearned income sources, such as dividends, interest and rent (DIR), as well as government transfer payments, such as welfare. Personal income represents place of residence data. All income data are presented in terms of real 2005 dollars. This means that the effects of inflation have been taken out of the numbers.

Earnings were derived from place of work data that included all workers, labor and proprietors. Social security contributions were subtracted along with a residence adjustment that corrected for earnings of persons living out-of-state.

Missing data represented by “.” in the tables are not always zeros; they may represent a decision by the BEA to restrict release of the information due to any of the following reasons:

- (D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the total.
- (L) Less than \$50,000, but the estimates for this item are included in the total.
- (N) Data not available during a year.

SECTION E. WCDA LOAN PURCHASE PROFILE

The Wyoming Community Development Authority (WCDA) began purchasing home loans in 1978 in an effort to facilitate homeownership. The tables in this section provide data, by county, on the various characteristics of the loans purchased by the WCDA and attributes of the homes purchased through these loans and those residents who purchased them, by fiscal year. While the years 1980-1985 are not printed, the totals include data from these early years.

SECTION G. SEMI-ANNUAL RENTAL VACANCY SURVEY

The Wyoming Semi-Annual Rental Vacancy Survey has been completed thirteen times, every six months, starting in July 2001 to most recently, July 2009. This survey is implemented via telephone and has proven to have high response rates and more complete and consistent answer sequences.

This section tabulates answers for a variety of questions. However, for all the improved techniques, respondents are not always able to completely answer every question sequence. For example, when asked about total units they were usually able to answer, but sometimes the respondent was not able to provide the discrete breakdown of the type or size of all their units. Consequently, the sum of the details in the following tables may not always equal the total. The July 2009 survey had 872 completions, covering some 23,260 rental units.
