Driver's Licenses Exchanged or Surrendered by County	
Section C	11
Housing Needs Assessment Surveys, Calendar Years 2001-2009	
Section D	61
WCDA's Tax Credit and HOME Project Units	
Section E	63
Bureau of Economic Analysis Employment and Income:	
Employment and Real Earnings per Job by Industry, 1990-2008	
Section F	67
Semi-Annual Rental Vacancy Survey, 2009	

SECTION A. WYOMING LABOR FORCE

Labor force data are from the Bureau of Labor Statistics (BLS) and Wyoming Department of Employment (Wyoming Labor Market Information). These data are estimated from the Current Population Survey (CPS) and have been adjusted for commuting and dual job holding. The data represent persons by place of residence. The data may include workers involved in Labor Management Disputes.

According to the BLS, the sum of individual items may not always equal the totals due to independent rounding off of totals and components to the nearest thousand.

Table A.1 Monthly Labor Force by County January – November 2009

* Out-of-state comprises mostly military personnel stationed elsewhere in the county.

** Totals may differ slightly from those in Section I and Section II because some records lacked a gender classification and were therefore not counted.

SECTION C. HOUSING NEEDS ASSESSMENT SURVEYS

These data are summarized from surveys administered at local Department of Transportation driver's license offices throughout Wyoming. These survey instruments are voluntary and directed to new residents of Wyoming, those individuals who come into local Department of Transportation offices to exchange their out-of-state license for a Wyoming license. Hence, the survey represents the situations, feelings and opinions of new residents to Wyoming.

Data in this section are presented as a percent distribution of all responses. These percent distributions may differ from those presented in Volume I of the *Profile*, because those narratives address a subset of all responses; e.g., *of those who are dissatisfied with their current housing*, the share of new residents that wish to own a home, or *of those that wish to rent*, the share that wish to rent for less than \$365 per month.

SECTION E. BUREAU OF ECONOMIC ANALYSIS DATA

The U.S. Bureau of Economic Analysis (BEA) employment and income data are drawn, in part, from income tax filings; hence, 2006 was the most currently available county-level data when this report was prepared.

The Office of Management and Budget (OMB) introduced the North American Industry Classification System (NAICS) to replace the Standard Industrial Classification (SIC) system.³ The NAICS system makes it possible to compare industry statistics among international, state and local economies. NAICS groups economic activities into 21 sectors, up from the 10 major divisions in the SIC system. The use of NAICS makes substantial time series breaks in most industries. Time series breaks will affect projections and comparisons of statistics over time due to differences in the two systems. One of the major differences is the structure of the NAICS taxonomy, which is based on a production-oriented, or supply-based, conceptual framework instead of an output-based framework, which characterized SIC.

Beginning with the 2001 data the BEA began using the NAICS in place of the SIC system. Since an industry-to-industry comparison to data prior to 2000 is not possible at this point in time, the employment and earnings data in this section present the latest NAICS data available for 2001 through 2005.

The following concepts are used in this section:

Employment represents jobs, not labor force (which counts people). These jobs include proprietorships, agricultural work, domestic employment, and casual labor jobs.

Income data include earnings from work as well as unearned income sources, such as dividends, interest, and rent (DIR), as well as government transfer payments, such as welfare. Personal income represents place of residence data. All income data is presented in terms of real 2005 dollars. This means that the effects of inflation have been taken out of the numbers.

Earnings were derived from place of work data that included all workers, labor, and proprietors. Social security contributions were subtracted along with a residence adjustment that corrected for earnings of persons living out-of-state.

Missing data represented by ‘.’ in the tables are not always zeros. They represent a decision by the BEA to restrict release of the information due to any of the following reasons:

- (D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the total.
- (L) Less than \$50,000, but the estimates for this item are included in the total.
- (N) Data not available during a year.

³ The Wyoming Department of Employment, Research & Planning, [<http://doe.state.wy.us/lmi/1000/a3.htm>], August, 2003.

SECTION F. SEMI-ANNUAL RENTAL VACANCY SURVEY

The Wyoming Semi-Annual Rental Vacancy Survey has been completed eighteen times, every six months, starting in July 2001 to most recently, December 2009 and January 2010. This survey is implemented via telephone and has proven to have high response rates and more complete and consistent answer sequences.

This section tabulates answers for a variety of questions. However, for all the improved techniques, respondents are not always able to completely answer every question sequence. For example, when asked about total units they were usually able to answer, but sometimes the respondent was not able to provide the discrete breakdown of the type or size of all their units. Consequently, the sum of the details in the following tables may not always equal the total. The latter 2009 survey had 1,010 completions, covering some 22,856 rental units.
