

ALBANY COUNTY

Demographics

The Census Bureau's current census estimates indicate that Albany County's population increased from 36,299 in 2010 to 37,276 in 2012, or by 2.7 percent. This compares to a statewide population growth of 2.3 percent over the period. The number of people from 25 to 44 years of age increased by 3.4 percent, and the number of people from 55 to 64 years of age increased by 7.4 percent. The white population increased by 2.1 percent, while the black population increased by 39.5 percent. The Hispanic population increased from 3,202 to 3,402 people between 2010 and 2012 or by 6.2 percent. These data are presented in Table II.1.1, below.

Table II.1.2, below, presents the population of Albany County by age and gender from the 2010 census and 2012 current census estimates. The 2010 census count showed a total of 18,897 males, who accounted for 52.1 percent of the population, and the remaining 47.9 percent, or 17,402 persons, were female. In 2012, the number of males rose to 19,349 persons, but only accounted for 51.9 percent of the population, with the remaining 48.1 percent, or 17,927 persons being female

At the time of the 2010 Census, there were 2,248 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters decreased by 6.8 percent, as shown in Table II.1.3, on the following page.

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 census.

To study these important concepts the Census Bureau conducts the American Community Survey. The Census Bureau quantifies the results as one-, three- and five year rolling averages. The one-year

⁵² In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

sample only includes responses from the year the survey was implemented and is only applicable to communities of at least 60,000 people. The 3-year American Community Survey creates a rolling average over a three year period for communities of 20,000 or more. The five year American Community Survey creates a rolling average for a five year period and the results are available for much smaller areas. The data presented below are from the five year rolling average.

Table II.1.4, below, shows data on household type by tenure in the 2011 5-year ACS data. Household type is broken down by family households and non-family households. In 2011, there were an estimated 7,204 family households, of which 5,818 housed married couple families and 1,386 housed "other families." "Other family" is defined as either a male householder with no wife present, of whom there were 552 families, or a female householder with no husband present, of which there were 834 families. There were also an estimated 7,479 "non-family households," which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Albany County was 49.1 percent, which compared to the statewide rate of 66.1 percent. Of the family households in Albany County, 80.8 percent were married households, which compared to 80.5 percent in the State of Wyoming.

Family Type	Albany County		State of Wyoming	
	Albany County	% of Total	State of Wyoming	% of Total

Table II.1.5, on the following page, displays the 2011 Five-Year ACS census data for household type by household size. In 2011, there were 3,911 two-person family households and 1,301 four-person family households. One-person non-family households made up 65.2 percent of all non-family households or an estimated 4,876 households. Albany County's two persons households made up 38.3 percent of total housing units and four person households made up an additional 10.8 percent, which compares to 38.1 and 12.1 percent, respectively, for the State of Wyoming.

The age of a structure influences its value. As shown in Table II.1.16, at right, structures built in 1939 or earlier had a median value of \$156,600, while structures built between 1950 and 1959 had a median value of \$187,400 and those built between 1990 to 1999 had a median value of \$261,000. The newest structures tended to have the highest values and those built between 2000 and 2004 and from 2005 or later had median values of \$327,600 and \$251,600, respectively. The total average median value in Albany County was \$194,900, which compared to \$181,900 in the State of Wyoming.

Table II.1.16 Median Value by Year Structure Built Albany County 2007-2011 Five-Year ACS Data		
Year Built	Albany County	State of Wyoming
1939 or earlier	156,600	148,000
1940 to 1949	152,600	130,200
1950 to 1959	187,400	155,800
1960 to 1969	202,600	171,100

Economics

The HUD estimated MFI for Albany County was \$74,500 in 2013.⁵³ This compared to Wyoming’s MFI of \$70,000. Diagram II.1.1, below, illustrates the estimated MFI for 2000 through 2013.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Albany County’s labor force, defined as the number of persons working or actively seeking work, increased by 198 persons, from 20,136 in 2011 to 20,334 in 2012. Employment increased by 246 persons; unemployment decreased by 48 persons; and the unemployment rate, or the number of

⁵³ Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

unemployed persons as a percentage of the labor force, decreased from 4.7 percent in 2011 to 4.4 percent in 2012, as shown below in Diagram II.1.2.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. As shown in Table II.1.20, below, annual total monthly employment decreased by 0.09 percent between 2011 and 2012, falling from a total of 15,343 to 15,329 workers. Preliminary estimates shows employment increased to 15,893 persons in June 2012.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2011, the most recent year for which data are available, Albany County recorded 21,621 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$1,383,883,000, and real per capita income was \$37,515 in 2011. This compares to a statewide average real per capita income of \$48,743. The average earnings per job in the county was \$41,124 in 2011, while Wyoming average earnings per job was \$49,682. These data are presented in full in **Volume II. Technical Appendix**.

Housing

According to the Wyoming cost of living index, average apartment rent in Albany County decreased by 3.5 percent from fourth quarter 2011 to fourth quarter 2012, from \$684 to \$660. During that same period, detached single-family home rents decreased by 0.7 percent, rents for mobile homes on lots increased by 0.9 percent, and rents for mobile home lots increased by 9.1 percent.

Albany County rental prices experienced average annualized increases of 2.9 percent for apartments, 3.7 percent for houses, 3.5 percent for mobile homes plus a lot, and 3.3 percent for mobile home lots since fourth quarter 1986 through the fourth quarter 2012. These figures compare to state average annualized increases in rental prices of 3.1 percent for apartments, 3.8 percent for houses, 3.4 percent for mobile homes plus a lot, and 3.0 percent for mobile home lots over that same period. Table II.1.23, at right, presents the Albany County data for each rental type.

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Albany County decreased from 145 authorizations in 2011 to 103 in 2012. Total residential units authorized decreased from 463 units in 2011 to 190 in 2012.

The real value of single-family building permits increased from \$141,108 in 2011 to \$151,698 in 2012. The value over the past decade, in real 2012 dollars, fluctuated from a high of \$183,900 in 2008 to a low of \$143,800 in 2001. Additional details of permit activity and per unit valuations are given in Table II.1.24, on the following page.

The average sales price of existing, detached, single-family homes was provided by the Department of Revenue (DOR). In 2012, the average sales price in Albany County was \$227,080. This represented a increase of 6.4 percent from the previous year. In contrast, Wyoming’s weighted average was \$266,406, an increase of 10.4 percent over the previous year. A comparison of average sales prices between 2000 and 2012 is displayed in Table II.1.25, on the following page.

Table II.1.25 Average Sales Prices Albany County vs. Wyoming DOR Data, 2000–2012

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in June 2013.⁵⁴ During June 2013, a total of 156 surveys were completed by property managers in Albany County. Of the 3,072 rental units surveyed, 171 were vacant, indicating a vacancy rate of 5.57 percent. This compares to a 3.83 percent vacancy rate one year ago, as shown in Table II.1.26, below, and a 2013 statewide vacancy rate of 4.93 percent. The surveys administered in June tend to have a higher vacancy rate due to the seasonal nature of the student population residing in Albany County.

Table II.1.26 Total Units, Vacant Units, and Vacancy Rate Albany County RVS Data, 2001–First Survey 2013				
Year	Sample	Total Units	Vacant Units	Vacancy Rate
2001a	8	528	33	6.25%

2013a	156	3,072	171	5.57%

⁵⁴ Those signified as a in the “year” column of Table II.1.10 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

Diagram II.1.3, below, shows the historical vacancy rate from Albany County and Wyoming . As can be seen, the vacancy rate in Albany County has been similar to the statewide vacancy rate, trending roughly the same, but with higher volatility over, the eleven year period.

Diagram II.1.4, below, shows the average rent of single-family and apartment units in Albany County. In the first half of 2013, rents for single-family units rose to \$957 and average rent for apartments increased to \$684.

Table II.1.27 on the following page, shows the amount of total and vacant units with their associated vacancy rates. At the time of the survey, there were an estimated 266 single family units in Albany County, with 11 of them available. This translates into a vacancy rate of 4.1%, which compares to a single family vacancy rate of 4.04% for the State of Wyoming. There were 1,497

apartment units reported in the survey, with 81 of them available, which resulted in a vacancy rate of 5.4%. This compares to a statewide vacancy rate of 5.63% for apartment units across the state.

Table II.1.33, below shows the availability of mobile home units by vacancy status. The lowest vacancy rate was seen in mobile home units renting for less than 500, with a vacancy rate of .00 percent.

Table II.1.34, below, shows the condition of rental units by unit type for Albany County. Respondents could rate their units from poor to excellent, however many respondents did not know, or wish to comment on the condition of their units. As reported below, most single family units were in good condition, with most apartments being in good condition, as well. Details on the conditions of additional unit types are displayed below.

The fiscal year 2013 Housing Needs Assessment (HNA) Survey, conducted primarily over the phone by the Partnership using a sample from data provided by the WYDOT, had 125 respondents in Albany County. Of the incoming persons who were unsatisfied with their current housing, 63.4 percent said they sought to own a home and 36.4 percent sought to rent. Of those seeking to own a home, 42.9 percent wished to buy existing units, of which 66.7 percent anticipated spending between \$100,000 - \$249,999 and 33.3 percent anticipated spending above \$250,000. Of those seeking to build, 50.0 percent wished to build for between \$100,000 and \$249,999 and 50.0 percent wished to build for above \$250,000.

Of those currently renting or seeking to rent, 50.0 percent anticipated spending between \$475 and \$849 with the remaining 50.0 percent hoped to spend above \$850 per month. Additional survey data are presented in **Volume II. Technical Appendix.**

The Wyoming Community Development Authority (WCDA) began purchasing home loans in 1978 to provide affordable housing in Wyoming. There were a total of 2,281 loans purchased in Albany County between 1979 and 2013, with 50 occurring in fiscal 2013. The average home size over the period was 1,120 square feet and 1,222 square feet in fiscal 2013. For homes receiving a WCDA loan in fiscal 2013, the average year a home was built was 1966. The average household income in fiscal 2013 in nominal terms, without the effects of inflation being taken into consideration, was \$49,453. The average purchase price in fiscal 2013 was \$156,731. In fiscal 2013, 2.0 percent of loans purchased were for new construction, and 42.0 percent had female heads of household. Fiscal year data for the entire operating history of the WCDA can be found in **Volume II. Technical Appendix.**

Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2011 five-year ACS data, 103 or 0.7 percent of households in Albany County were overcrowded and another 52 or 0.4 percent of units were severely overcrowded, as shown in Table II.1.39, below. This housing problem was far more prevalent in renter households as compared to owner households.

Table II.1.39				
Overcrowding and Severe Overcrowding				
Albany County				
2007-2011 Five-Year ACS Data				
Household	No Overcrowding	Overcrowding	Severe Overcrowding	Total

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2011 five-year ACS, a total of 268 units or 1.5 percent of all housing units in Albany County were lacking complete kitchen facilities. This compared to 2.9 percent of households statewide without complete kitchen facilities. These data are presented in Table II.1.40, at right.

Table II.1.40 Housing Units with Incomplete Kitchen Facilities Albany County 2007-2011 Five-Year ACS Data		
Facilities	Albany County	State of Wyoming
Complete Kitchen Facilities	17,541	251,420
Lacking Complete Kitchen Facilities	268	7,570
Total Housing Units	17,809	258,990
Percent Lacking	1.5%	2.9%

At the time of the 2011 ACS, a total of 219 units or 1.2 percent of all housing units in Albany County were lacking complete plumbing facilities. This compared to 2.4 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.1.41, at right.

Table II.1.41 Housing Units with Incomplete Plumbing Facilities Albany County 2007-2011 Five-Year ACS Data		
Facilities	Albany County	State of Wyoming
Complete Plumbing Facilities	17,590	252,719
Lacking Complete Plumbing Facilities	219	6,271
Total Households	17,809	258,990
Percent Lacking	1.2%	2.4%

The third type of housing problem reported in the 2011 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Albany County, 15.1 percent of households had a cost burden and 20.2 percent of households had a severe cost burden, which compared to 13.9 percent with a cost burden and 9.5 percent with a severe cost burden in the State of Wyoming. Roughly 17.2 percent of homeowners with a mortgage in Albany County experienced a cost burden and 14.1 percent experienced a severe cost burden, while 17.6 percent of renters had a cost burden and 32.2 percent had a severe cost burden, as shown in Table II.1.42, on the following page.
