

## CAMPBELL COUNTY

### Demographics

The Census Bureau's current census estimates indicate that Campbell County's population increased from 46,133 in 2010 to 48,320 in 2014, or by 4.7 percent. This compares to a statewide population growth of 3.6 percent over the period. The number of people from 25 to 44 years of age increased by 6.4 percent, and the number of people from 55 to 64 years of age increased by 26.4 percent. The white population increased by 3.6 percent, while the black population increased by 139.1 percent. The Hispanic population increased from 3,611 to 3,955 people between 2010 and 2014, or by 9.5 percent. These data are presented in Table II.3.1, below.

Table II.3.2, on the following page, presents the population of Campbell County by age and gender from the 2010 Census and 2014 current census estimates. The 2010 Census count showed a total of 24,258 males, who accounted for 52.6 percent of the population, and the remaining 47.4 percent, or 21,875 persons, were female. In 2014, the number of males rose to 25,139 persons, and accounted for 52.0 percent of the population, with the remaining 48.0 percent, or 23,181 persons, being female.

At the time of the 2010 Census, there were 422 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters increased by 31.5 percent, as shown in Table II.3.3, below.

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year

<sup>79</sup> In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the census tract level, and considered more robust than the one- or three-year sample estimates.

Table II.3.4, below, shows data on household type by tenure in the 2013 5-year ACS data. Household type is broken down by family households and non-family households. In 2013, there were an estimated 12,141 family households, of which 9,821 housed married couple families and 2,320 housed “other families.” “Other family” is defined as either a male householder with no wife present, of whom there were 828 families, or a female householder with no husband present, of which there were 1,492 families. There were also an estimated 4,967 “non-family households,” which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Campbell County was 71.0 percent, which compared to the statewide rate of 66.0 percent. Of the family households in Campbell County, 80.9 percent were married households, which compared to 80.3 percent in the State of Wyoming.

Table II.3.5, on the following page, displays the 2013 5-year ACS census data for household type by household size. In 2013, there were 4,977 two-person family households, 2,761 three-person family households and 2,557 four-person family households. One-person non-family households made up 72.3 percent of all non-family households, or an estimated 3,590 households. Campbell County’s two-person households made up 36.0 percent of total housing units and four-person households made up an additional 15.1 percent, which compares to 38.1 and 12.0 percent, respectively, for the State of Wyoming.

Poverty statistics were also reported in the 2013 5-year ACS estimates, and these data are displayed in Table II.3.11, below. In total, the poverty rate in Campbell County was 7.7 percent, which compared to a statewide poverty rate of 11.5 percent in Wyoming. The male population in Campbell County had a poverty rate of 5.4 percent and the female population had a poverty rate of 10.3 percent. There were 435 males and 262 females in poverty under the age of 5. Overall, 19.4 percent of persons in poverty in Campbell County were under the age of five, which compared to 13.7 percent statewide. The elderly population, comprised of individuals 65 years of older, had 164 individuals with incomes below the poverty level which represented 4.6 percent of the total population in poverty. In the State of Wyoming there were 4,477 individuals with incomes below the poverty level which represented 7.0 percent of the total Wyoming population in poverty.

Table II.3.13, below, shows the number of households by year of construction. As shown, 2.1 percent, or 367 units, were built in 1939 or earlier in the county, and another 313 percent were built between 1940 and 1949. The number of households built between 2000 and 2004 was 4,922, which accounted for 28.8 percent of all households, and an additional 288 households, or 1.7 percent, were built in 2005 or later. These figures compare to 2,633 households, or 1.2 percent, that were built from 2005 or later statewide.

The age of a structure influences its value. As shown in Table II.3.16, at right, structures built in 1939 or earlier had a median value of \$173,300, while structures built between 1950 and 1959 had a median value of \$188,300 and those built between 1990 and 1999 had a median value of \$188,000. The newest structures tended to have the highest values and those built between 2000 and 2004 and from 2005 or later had median values of \$215,900 and \$325,000, respectively. The total average median value in Campbell County was \$201,900, which compared to \$185,900 in the State of Wyoming.

<b>Table II.3.16</b> <b>Median Value by Year Structure Built</b> Campbell County 2009-2013 5-Year ACS Data		
Year Built	Campbell County	State of Wyoming
1939 or earlier	173,300	154,300

**Economics**

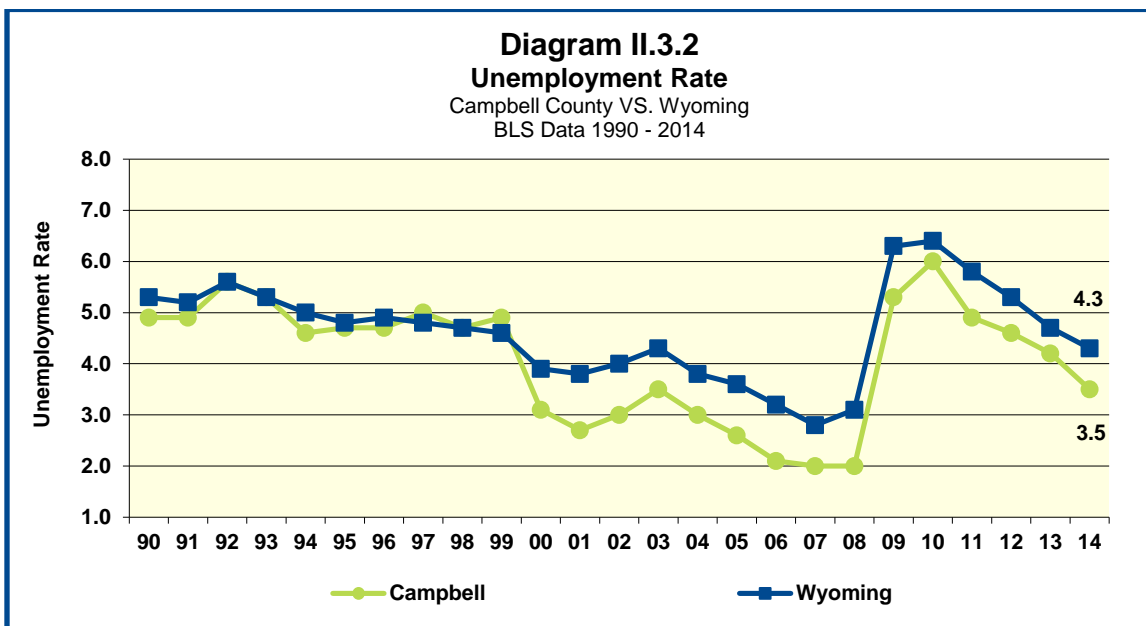

The HUD estimated MFI for Campbell County was \$89,700 in 2015.<sup>80</sup> This compares to Wyoming’s MFI of \$72,400. Diagram II.3.1, below, illustrates the estimated MFI for 2000 through 2015.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Campbell County’s labor force, defined as the number of persons working or actively seeking work,

<sup>80</sup> Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

decreased by 618 persons, from 25,710 in 2013 to 26,328 in 2014. Employment increased by 794 persons; unemployment decreased by 176 persons; and the unemployment rate, or the number of unemployed persons as a percentage of the labor force, decreased from 4.2 percent in 2013 to 3.5 percent in 2014, as shown below in Diagram II.3.2.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. As shown in Table II.3.20, below, annual total monthly employment increased by 4.27 percent between 2013 and 2014, from a total of 27,334 to 28,500 workers.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2013, the most recent year for which data are available, Campbell County recorded 32,234 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$2,455,481,000, and real per capita income was \$50,969 in 2013. This compares to a statewide average real per capita income of \$52,826. The average earnings per job in the county was \$69,886 in 2013, while Wyoming average earnings per job was \$52,420. These data are presented in full in **Volume II. Technical Appendix**.

**Housing**

According to the Wyoming Cost of Living Index, real average apartment rent in Campbell County increased from \$717 to \$778 from fourth quarter 2013 to fourth quarter 2014, or by 8.5 percent. During the same period, detached single-family home rents decreased by 1.9 percent, rents for mobile homes on a lot decreased by 2.3 percent, and rents for mobile home lots increased by 0.2 percent.

Campbell County rental prices experienced average annualized increases of 1.3 percent for apartments, 1.4 percent for houses, 1.7 percent for mobile homes plus a lot, and 1.0 percent per year for mobile home lots since fourth quarter 1986 through fourth quarter 2014. These figures compare to state average annualized increases in rental prices of 1.1 percent for apartments, 1.6 percent for houses, 1.1 percent for mobile homes plus a lot, and 0.9 percent for mobile home lots over the same period. Table II.3.23, at right, presents the Campbell County data for each rental type.

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Campbell County increased from 122 authorizations in 2013 to 163 in 2014.

The real value of single-family building permits decreased from \$449,079 in 2013 to \$407,468 in 2014. This compares to an increase in permit value statewide, with values rising from \$293,820 in 2013 to \$295,850 in 2014. Additional details are given in Table II.3.24, on the following page.

The average sales price of existing, detached, single-family homes was provided by the Department of Revenue (DOR). In 2013, the average sales price in Campbell County was \$248,826. This represented a increase of 4.3 percent from the previous year. In contrast, Wyoming’s average was \$263,432 which was a decrease of 6.4 percent over the previous year. A comparison of average sales prices between 1999 and 2014 is displayed in Table II.3.25, on the following page.

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually during the past 14 years, with the most recent survey conducted in June 2015.<sup>81</sup> During June 2015, a total of 134 surveys were completed by property managers in Campbell County. Of the 3,743 rental units surveyed, 136 were vacant, indicating a vacancy rate of 3.6 percent, as shown in Table II.3.26, below. This compares to a 3.2 percent vacancy rate one year ago and a June 2015 statewide vacancy rate of 5.4 percent.

2015a	134	3,743	136	3.6%

<sup>81</sup> Those signified as a in the “year” column of Table II.3.10 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

Diagram II.3.3, below, shows the historical vacancy rate for Campbell County and Wyoming. As can be seen, the vacancy rate in Campbell County was lower than the statewide rate for the first half of the decade, but jumped up above the statewide rate in 2007 and has been higher until the 2014 surveys, when it fell to 1.8 percent in December 2014.

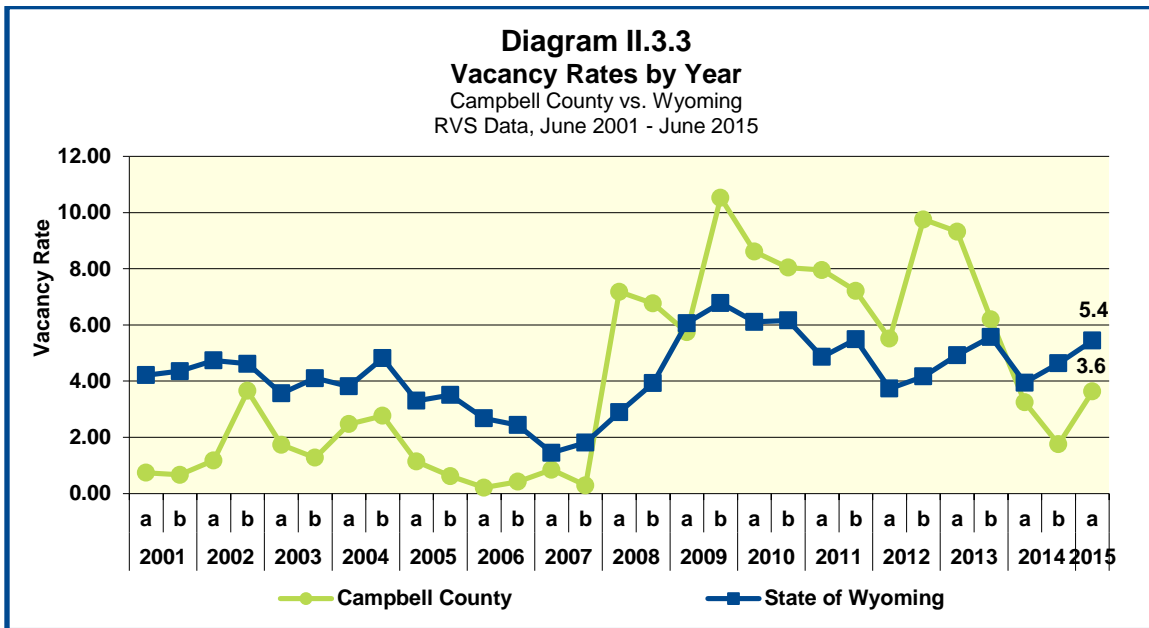

Diagram II.3.4, below, shows the average rent of single-family and apartment units in Campbell County. In the first half of 2015, rents for single-family units fell to \$1,108 and average rents for apartments fell to \$845.

Table II.3.27 below shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 286 single family units in Campbell County, with 14 of them available. This translates into a vacancy rate of 4.9 percent in Campbell County, which compares to a single family vacancy rate of 4.7 percent for the State of Wyoming. There were 2,688 apartment units reported in the survey, with 76 of them available, which resulted in a vacancy rate of 2.8 percent. This compares to a statewide vacancy rate of 3.0 percent for apartment units across the state.

Average market-rate rents by unit type are shown in Table II.3.31, below. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

<b>Table II.3.31</b>						
<b>Average Market Rate Rents by Bedroom Size</b>

Table, II.3.40, on the following page, shows the most common answers from the 2015 Fiscal year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Campbell County had a total of 96 respondents, with an average persons per household of 2.7 people. Of new residents to Campbell County, 51.6 percent were married and the most common age group arriving in the state was 25 to 34 years old. Most new residents moved for a new job.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 68.8 percent of respondents renting their residence. The average mortgage payment in Campbell County was \$1,218 and the average rent was \$1,002. When asked if they were satisfied with their current housing, 76.0 percent said they were satisfied with their current housing.

<b>Table II.3.40</b> <b>Most Replied Response</b> Campbell County HNA Survey: Fiscal Year 2015	
Question	Most Replied Answer (%)
<b>Demographics</b>	
Total Number of Respondents	96
Number of persons in household (Average)	2.7
Current age	25 to 34 years old (32.3%)
Marital status	Married (51.6%)
Primary reason for moving to Wyoming	New job (29.2%)
In which industry are you primarily employed	Other (35.4%)
Highest education level completed	High School Diploma/GED (33.3%)
Total household income from all sources	\$50,000 to \$74,999 dollars (16.1%)
<b>Current Housing Characteristics</b>	
Current Residence	Single family home (51.0%)
Do you own or rent	Rent (68.8%)
How many bedrooms (Average)	2.7
How many full bathrooms (Average)	1.8
Average mortgage payment	\$1,218
Average rental payment	\$1,002
Are you satisfied with your current housing	Satisfied with current housing (76.0%)
<b>Housing Demand (If unsatisfied with current housing)</b>	
Reason you are unsatisfied	Other (44.4%)
Are you seeking to change your housing situation	Seeking different housing (75.0%)
What type of unit are you seeking	Single family home (78.6%)
Type of tenure seeking	Seeking to buy (50.0%)
If own, do you plan on building or buying	Buy an existing unit (87.5%)
Expected buying price	\$200,000 to \$249,999 dollars (100.0%)
Expected building price	\$150,000 to \$199,999 dollars (50.0%)
Expected rental price	\$901 to \$1,000 dollars (66.7%)

For residents who are unsatisfied with their current housing, 44.4 percent were unsatisfied because of some other reason not listed in the survey. When asked what type of unit they were seeking, the most common response, 78.6 percent, indicated they were seeking a single family home. When asked if they preferred to own or rent, 50.0 percent wanted to buy and 42.9 wanted to rent their next residence. Most residents wishing to buy a house anticipated spending \$200,000 to \$249,999 dollars if they were buying an existing unit, and \$150,000 to \$199,999 dollars if they anticipated building a new unit. Of those respondents who wished to rent, the most common response, 66.7 percent of respondents, anticipated spending \$901 to \$1,000 dollars. Additional survey data are presented in **Volume II. Technical Appendix**.<sup>82</sup>

### Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2013 5-year ACS data, 365, or 2.1 percent, of households in Campbell County were overcrowded and another 91, or 0.5 percent of units, were severely overcrowded, as shown in Table II.3.41, on the following page.

<sup>82</sup> Percentages presented here may vary slightly from those in the technical appendix. This is because the percentages here are calculated with the missing responses excluded, where the percentages calculated in the technical appendix include all responses, even if they are missing.

This housing problem was far more prevalent in renter households as compared to owner households.

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2013 5-year ACS, a total of 183 units, or 1.0 percent of all housing units in Campbell County, were lacking complete kitchen facilities. This compared to 2.6 percent of households statewide without complete kitchen facilities. These data are presented in Table II.3.42, at right.

<b>Table II.3.42</b>		
<b>Housing Units with Incomplete Kitchen Facilities</b>		
Campbell County		
2009-2013 5-Year ACS Data		
<b>Facilities</b>	<b>Campbell County</b>	<b>State of Wyoming</b>
Complete Kitchen Facilities	18,913	256,276
Lacking Complete Kitchen Facilities	183	6,764
<b>Total Housing Units</b>	<b>19,096</b>	<b>263,040</b>
Percent Lacking	1.0%	2.6%

At the time of the 2013 ACS, a total of 131 units, or 0.7 percent, of all housing units in Campbell County were lacking complete plumbing facilities. This compared to 2.0 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.3.43, below.

<b>Table II.3.43</b>		
<b>Housing Units with Incomplete Plumbing Facilities</b>		
Campbell County 2009-2013 5-Year ACS Data		
<b>Facilities</b>	<b>Campbell County</b>	<b>State of Wyoming</b>

<b>Total Households</b>	<b>19,096</b>	<b>263,040</b>
Percent Lacking	.7%	2.0%

The third type of housing problem reported in the 2013 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Campbell County, 14.4 percent of households had a cost burden and 5.9 percent of households had a severe cost burden, which compared to 14.3 percent with a cost burden and 9.9 percent with a severe cost burden in the State of Wyoming. Roughly 15.5 percent of homeowners with a mortgage in Campbell County experienced a cost burden and 5.0 percent experienced a severe cost burden, while 21.5 percent of renters had a cost burden and 11.1 percent had a severe cost burden, as seen in Table II.3.44, on the following page.

<b>Table II.3.44</b>

### 2015 WCDA Loan Profile

The Wyoming Community Development Authority (WCDA) began purchasing home loans in 1978 to provide affordable housing in Wyoming. There were a total of 6,045 loans purchased in Campbell County between 1979 and 2015, with 135 occurring in fiscal 2015. The average home size over the period was 1,315 square feet and 1,408 square feet in fiscal 2015. For homes receiving a WCDA loan in fiscal 2015, the average year a home was built was 1994. The average household income in fiscal 2015 in nominal terms, without the effects of inflation being taken into consideration, was \$57,793. The average purchase price in fiscal 2015 was \$170,740. In fiscal 2015, 5.2 percent of loans purchased were for new construction, and 28.1 percent had female heads of household. Fiscal year data for the entire operating history of the WCDA can be found in **Volume II. Technical Appendix.**

## Additional Comments

Campbell County has seen an increase in the number of students enrolled in the district, coming in at the third largest district in the state.<sup>83</sup> This may be a result of the increase in energy jobs and an influx of people perusing those opportunities. However, as of June, Campbell County saw a slight increase in unemployment.<sup>84</sup> This is attributed mainly to the downfall of some areas in the energy-fueled economy. The continued growth in the area or decline will depend, partially, on this industry's success in the upcoming year.
