

## NIOBRARA COUNTY

### Demographics

The Census Bureau's intercensal estimates indicate that Niobrara County's population increased from 2,484 in 2010 to 2,491 in 2011, or by 0.3 percent. This compares to a statewide population growth of 0.8 percent over the period.<sup>118</sup> The number of people from 15 to 24 years of age increased by 3.4 percent, and the number of people from 55 to 64 years of age increased by 9.6 percent. The white population decreased by 0.2 percent, while the black population increased by 83.3 percent. The Hispanic population increased from 52 to 68 people between 2010 and 2011 or by 30.8 percent. These data are presented in Table II.14.1, below.

Table II.14.3, below, presents the population of Niobrara County by age and gender from the 2000 and 2010 census counts. Between 2000 and 2010, the population increased by 3.2 percent, with the largest total increase occurring in the group aged 55 to 64, which rose by 69 persons, or by 23.4 percent. In 2010, the largest age group in Niobrara County was the group aged 35 to 54, which accounted for 28.7 percent of the entire population. The 2010 census count showed a total of 1,159 males, who accounted for 46.7 percent of the population, and the remaining 53.3 percent, or 1,325 persons, were female.

At the time of the 2010 Census, there were 214 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters increased by 111.9 percent, as shown in Table II.14.4, on the following page.

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the census tract level, and considered more robust than the one or three year sample estimates.

Table II.14.5, on the following page, shows data on household type by tenure in the 2011 5-year ACS data. Household type is broken down by family households and non-family households. In 2011, there were an estimated 675 family households, of which 571 housed married couple families and 104 housed "other families." "Other family" is defined as either a male householder with no wife present, of whom there were 19 families, or a female householder with no husband present, of which there were 85 families. There were also an estimated 366 "non-family households," which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Niobrara County was 64.8 percent, which compared to the statewide rate of 66.1 percent. Of the family households in Niobrara County, 84.6 percent were married households, which compared to 80.5 percent in the State of Wyoming.

<sup>119</sup> In the 2010 Census, "juvenile facilities" and "correctional facilities" were reported separately.

Table II.14.13, on the following page, presents the breakdown of households by unit type and tenure. Between 2006 and 2011, Niobrara County saw an average of 629 owner-occupied single-family units compared to 243 single-family rental units. In Niobrara County, single-family units comprised 83.8 percent of all households compared with 71.7 percent statewide. Niobrara County had a total of 58 apartment rental units and total apartment units accounted for 5.6 percent of all households. In the State of Wyoming, apartment units accounted for 7.7 percent of total households. There were also an estimated 94 mobile homes in Niobrara County, which comprised 9.0 percent of all occupied housing units and compared to 13.8 statewide.

Table II.14.14, below, shows the number of households by year of construction. As shown, 37.2 percent, or 387 units, were built in 1939 or earlier in the county, and another 90 were built between 1940 and 1949. The number of households built between 2000 and 2004 was 8, which accounted for 0.8 percent of all households, and an additional 18 households, or 1.7 percent, were built in 2005 or later. These figures compare to 14,269 households, or 6.5 percent, that were built from 2005 or later statewide.

The age of a structure influences its value. As shown in Table II.14.17, at right, structures built in 1939 or earlier had a median value of \$80,300, while structures built between 1950 and 1959 had a median value of \$103,100 and those built between 1990 to 1999 had a median value of \$87,900. The newest structures tended to have the highest values and those built between 2000 and 2004 and from 2005 or later had median values of \$1,000,001 and \$112,500, respectively. The total average median value in Niobrara County was \$105,400, which compared to \$181,900 in the State of Wyoming.

<b>Table II.14.17</b> <b>Median Value by Year Structure Built</b> Niobrara County 2007-2011 Five-Year ACS Data

**Economics**

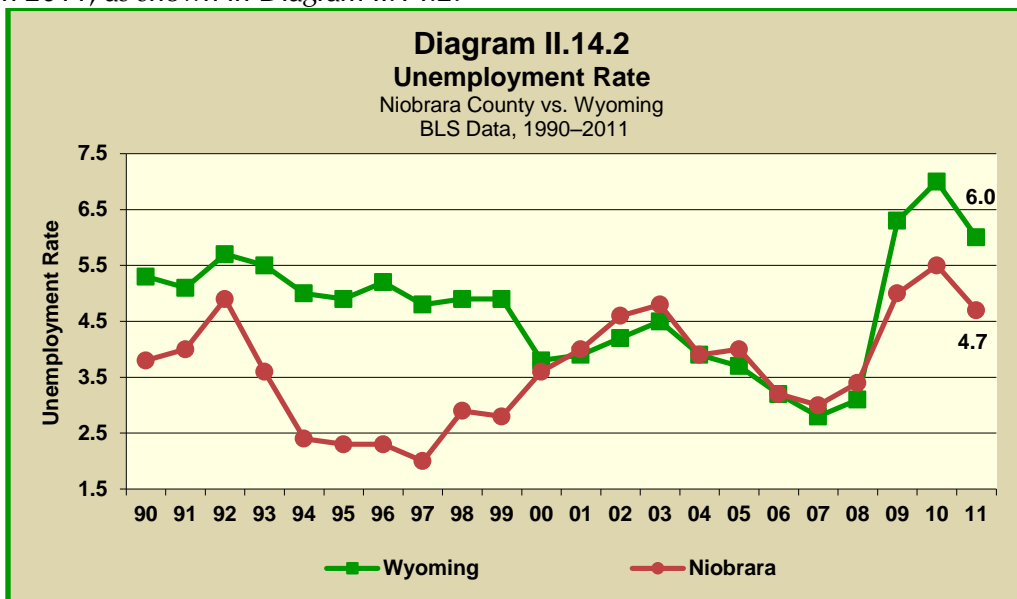

The HUD estimated MFI for Niobrara County was \$60,700 in 2013.<sup>120</sup> This compares to Wyoming’s MFI of \$70,000. Diagram II.14.1, below, illustrates the estimated MFI for 2000 through 2013.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Niobrara County’s labor force, defined as the number of persons working or actively seeking work, increased by 9 persons, from 1,298 in 2010 to 1,307 in 2011. Employment increased by 20 persons; unemployment decreased by eleven persons; and the unemployment rate, the number of

<sup>120</sup> Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

unemployed persons as a percentage of the labor force, decreased from 5.5 percent in 2010 to 4.7 percent in 2011, as shown in Diagram II.14.2.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. As shown in Table II.14.21, below, annual total monthly employment increased by 2.64 percent between 2010 and 2011, from a total of 872 to 895 workers. Preliminary estimates shows employment increased to 955 persons in June 2012.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2011, the most recent year for which data are available, Niobrara County recorded 2,026 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$105,644,000, and real per capita income was \$42,410 in 2011. Average earnings per job in the county was \$30,062 in 2011. These data are presented in full in **Volume II. Technical Appendix.**

**Housing**

According to the Wyoming Cost of Living Index, average apartment rent in Niobrara County increased from \$418 in second quarter 2011 to \$470 in second quarter 2012, or by 12.2 percent. Detached single-family home rents remained unchanged.

Niobrara County rental prices experienced average annualized increases of 4.2 percent for apartments and 3.3 percent for houses from fourth quarter 1998 through second quarter 2012.<sup>121</sup> These figures compare to state average annualized increases in rental prices of 3.3 percent for apartments and 3.8 percent for houses over the same period. Table II.14.24, at right, presents the Niobrara County data for each rental type.<sup>122</sup>

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Total residential units authorized in Niobrara County decreased from four units in 2010 to three in 2011.

The real value of single-family building permits decreased from \$81,700 in 2010 \$31,500 in 2011. The value over the past decade, in real 2011 dollars, fluctuated from a high of \$170,200 in 2006 to a low of \$31,500 in 2011. These figures compare to the state average high of \$270,950 in 2000 and low of \$184,110 in 2003. Additional details of permit activity and per unit valuations are given in Table II.14.25, on the following page.

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000 with the most recent survey conducted in December 2012.<sup>123</sup> During December 2012, a total of four surveys were completed by property managers in Niobrara County. Of the 67 rental units surveyed, five were vacant, indicating a vacancy rate of 2.99 percent. This compares to an 2.63 percent vacancy rate one year ago and a statewide December 2012 vacancy rate of 4.17 percent as shown in Table II.12.27, below.

Diagram II.14.3, on the following page, shows the historical vacancy rate for Niobrara County and Wyoming. As can be seen, the vacancy rate in Niobrara County was generally higher than the statewide rate except for a brief period between 2007 and 2009.

<sup>123</sup>Those signified as a in the “year” column of Table II.14.10 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

Diagram II.14.4, below, shows the average rent of single-family and apartment units in Niobrara County. In the second half of 2012, average rents for single-family units increased to \$540.

The calendar year 2012 Housing Needs Assessment (HNA) Survey, conducted primarily over the phone by the Partnership using a sample from data provided by the WYDOT, had 9 respondents in Niobrara County. Of the incoming population who were unsatisfied with their current housing, 100 percent of respondents wished to rent.

Of those respondents who were seeking to rent, 100 percent anticipated spending above \$850.

The Wyoming Community Development Authority (WCDA) began purchasing home loans in 1978 to provide affordable housing in Wyoming. There were a total of 102 loans purchased in Niobrara County between 1979 and 2012, with two occurring in fiscal 2012. The average home size over the period was 1,279 square feet and 1,015 square feet in fiscal 2012. For homes receiving a WCDA loan in fiscal 2012, the average year a home was built was 1949. The average household income in fiscal 2012 in nominal terms, without the effects of inflation being taken into consideration, was \$33,342. The average purchase price in fiscal 2012 was \$61,750. Fiscal year data for the entire operating history of the WCDA can be found in **Volume II. Technical Appendix**.

**Housing Problems**

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2011 five-year ACS data, 0 or .0 percent of households in Niobrara County were overcrowded and another 0 or .0 percent of units were severely overcrowded, as shown in Table II.14.28, below. This housing problem was far more prevalent in renter households as compared to owner households.

<b>Table II.14.28</b>

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2011 five-year ACS, a total of 59 units or 4.2 percent of all housing units in Niobrara County were lacking complete kitchen facilities. This compared to 2.9 percent of households statewide without complete kitchen facilities. These data are presented in Table II.14.29, at right.

<b>Table II.14.29</b> <b>Housing Units with Incomplete Kitchen Facilities</b> Niobrara County 2007-2011 Five-Year ACS Data		
Facilities	Niobrara County	State of Wyoming
Complete Kitchen Facilities	1,336	251,420
Lacking Complete Kitchen Facilities	59	7,570
<b>Total Housing Units</b>	<b>1,395</b>	<b>258,990</b>
Percent Lacking	4.2%	2.9%

At the time of the 2011 ACS, a total of 72 units or 5.2 percent of all housing units in Niobrara County were lacking complete plumbing facilities. This compared to 2.4 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.14.30, at right.

<b>Table II.14.30</b> <b>Housing Units with Incomplete Plumbing Facilities</b> Niobrara County 2007-2011 Five-Year ACS Data		
Facilities	Niobrara County	State of Wyoming

<b>Total Households</b>	<b>1,395</b>	<b>258,990</b>
Percent Lacking	5.2%	2.4%

The third type of housing problem reported in the 2011 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Niobrara County, 11.3 percent of households had a cost burden and 8.5 percent of households had a severe cost burden, which compared to 13.9 percent with a cost burden and 9.5 percent with a severe cost burden in the State of Wyoming. Roughly 14.2 percent of homeowners with a mortgage in Niobrara County experienced a cost burden and 7.3 percent experienced a severe cost burden, while 16.4 percent of renters had a cost burden and 12.0 percent had a severe cost burden, as shown in Table II.14.31, on the following page.

## 2013 HOUSING NEEDS FORECAST

Three alternative housing forecasts were prepared: a *moderate growth* scenario, a *strong growth* scenario and a *very strong growth* scenario. While all three predictions are available in the *2013 Wyoming Housing Needs Forecast*, only the *strong growth* forecast is presented on the following page. The forecast of household formation by tenure was segmented by income as a percentage of Median Household Income (MHI). The income groupings for the counties were separated into five categories: 0 to 30 percent, 31 to 50 percent, 51 to 80 percent, 81 to 95 percent, and more than 95 percent of MHI.

The household forecast indicated a total increase of 739 households in Niobrara County, from 1,069 in 2010 to 1,808 in 2040. Homeowners are expected to increase from 770 households in 2010 to 1,331 by 2040. Renters are anticipated to increase from 299 households in 2010 to 477 in 2040.

Homeownership from 2010 to 2040 is expected to increase by 42 households for homeowners with extremely low incomes or 30 percent or less of MHI. Homeownership for those with incomes from 31 to 50 percent of MHI is expected to increase by 53 households and by 90 for those with 51 to 80 percent of MHI.

Rental demand from the years 2010 to 2040 is expected to increase by 40 households for renters with extremely low incomes or 30 percent or less of MHI. Further, rental demand for those with 30

to 50 percent of MHI is expected to increase by 30 households over the period. Table II.14.32, on the following page, provides details of the household forecast by tenure and income.
