

## WASHAKIE COUNTY

### Demographics

The Census Bureau's intercensal estimates indicate that Washakie County's population increased from 6,737 in 2010 to 6,738 in 2011, or by 0.0 percent. This compares to a statewide population growth of 0.8 percent over the period.<sup>158</sup> The number of people from 15 to 24 years of age increased by 0.3 percent, and the number of people from 55 to 64 years of age increased by 2.6 percent. The white population increased by 0.8 percent, while the black population increased by 16.7 percent. The Hispanic population increased from 1,162 to 1,166 people between 2010 and 2011 or by 0.3 percent. These data are presented in Table II.22.1, below.

Table II.22.3, below, presents the population of Washakie County by age and gender from the 2000 and 2010 census counts. Between 2000 and 2010, the population increased by 2.9 percent, with the largest total increase occurring in the group aged 55 to 64, which rose by 319 persons, or by 36.7 percent. In 2010, the largest age group in Washakie County was the group aged 35 to 54, which accounted for 25.5 percent of the entire population. The 2010 census count showed a total of 4,255 males, who accounted for 49.9 percent of the population, and the remaining 50.1 percent, or 4,278 persons, were female.

At the time of the 2010 Census, there were 140 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters decreased by 29.3 percent, as shown in Table II.22.4, on the following page.

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the census tract level, and considered more robust than the one or three year sample estimates.

Table II.22.5, on the following page, shows data on household type by tenure in the 2011 5-year ACS data. Household type is broken down by family households and non-family households. In 2011, there were an estimated 2,307 family households, of which 1,974 housed married couple families and 333 housed “other families.” “Other family” is defined as either a male householder with no wife present, of whom there were 152 families, or a female householder with no husband present, of which there were 181 families. There were also an estimated 1,157 “non-family households,” which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Washakie County was 66.6 percent, which compared to the statewide rate of 66.1 percent. Of the family households in Washakie County, 85.6 percent were married households, which compared to 80.5 percent in the State of Wyoming.

<sup>159</sup> In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

Table II.22.6, below, displays the 2011 Five-year ACS census data for household type by household size. In 2011, there were 1,158 two-person family households, 342 three-person family households and 460 four-person family households. One-person non-family households made up 88.9 percent of all non-family households or an estimated 1,029 households. Washakie County's two persons households made up 37.1 percent of total housing units and four person households made up an additional 13.3 percent, which compares to 38.1 and 12.1 percent, respectively, for the State of Wyoming.

Table II.22.13, on the following page, presents the breakdown of households by unit type and tenure. Between 2006 and 2011, Washakie County saw an average of 2,281 owner-occupied single-family units compared to 530 single-family rental units. In Washakie County, single-family units comprised 81.1 percent of all households compared with 71.7 percent statewide. Washakie County had a total of 27 apartment rental units and total apartment units accounted for .8 percent of all households. In the State of Wyoming, apartment units accounted for 7.7 percent of total households. There were also an estimated 384 mobile homes in Washakie County, which comprised 11.1 percent of all occupied housing units and compared to 13.8 statewide.

Table II. 22.14, below, shows the number of households by year of construction. As shown, 12.8 percent, or 442 units, were built in 1939 or earlier in the county, and another 265 were built between 1940 and 1949. The number of households built between 2000 and 2004 was 48, which accounted for 1.4 percent of all households, and an additional 139 households, or 4.0 percent, were built in 2005 or later. These figures compare to 14,269 households, or 6.5 percent, that were built from 2005 or later statewide.

The age of a structure influences its value. As shown in Table II.22.17, at right, structures built in 1939 or earlier had a median value of \$126,500, while structures built between 1950 and 1959 had a median value of \$107,300 and those built between 1990 to 1999 had a median value of \$202,200. The newest structures tended to have the highest values and those built between 2000 and 2004 and from 2005 or later had median values of \$245,000 and \$279,300, respectively. The total average median value in Washakie County was \$148,400, which compared to \$181,900 in the State of Wyoming.

<b>Table II.22.17</b> <b>Median Value by Year Structure Built</b> Washakie County 2007-2011 Five-Year ACS Data

**Economics**

The HUD estimated MFI for Washakie County was \$65,200 in 2013.<sup>160</sup> This compares to Wyoming’s MFI of \$70,000. Diagram II.22.1, below, illustrates the estimated MFI for 2000 through 2013.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Washakie County’s labor force, defined as the number of persons working or actively seeking work, decreased by 8 persons, from 4,462 in 2010 to 4,454 in 2011. Employment increased by 26 persons; unemployment decreased by 34 persons; and the unemployment rate, or the number of unemployed persons as a percentage of the labor force, decreased from 6.6 percent in 2010 to 5.8 percent in 2011, as shown on the following page in Diagram II.22.2.

<sup>160</sup> Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. As shown in Table II.22.21, below, annual total monthly employment increased by 0.23 percent between 2010 and 2011, from a total of 3,948 to 3,957 workers. Preliminary estimates shows employment increased to 4,113 persons in June 2012.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2011, the most recent year for which data are available, Washakie County recorded 5,732 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$41,837,000 and real per capita income was \$41,837 in 2011. Average earnings per job in the county was \$41,972 in 2011. These data are presented in full in **Volume II. Technical Appendix.**

**Housing**

According to the Wyoming cost of living index, average apartment rent in Washakie County decreased from \$438 in second quarter 2011 to \$421 in second quarter 2012, or by 3.9 percent. Detached single-family home rents increased by 2.0 percent and mobile home lots remained unchanged.

Washakie County rental prices experienced average annualized increases of 1.9 percent for apartments, 3.0 percent for houses, and 2.7 percent for mobile home lots since fourth quarter 1986 through second quarter 2012. These figures compare to state average annualized increases in rental prices of 3.3 percent for apartments, 3.8 percent for houses, 3.4 percent for mobile homes plus a lot, and 3.1 percent for mobile home lots over the same period. Table II.22.24, at right, presents the Washakie County data for each rental type.<sup>161</sup>

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Washakie County increased from one authorized units in 2010 to two in 2011.

The real value of single-family building permits increased from \$132,800 in 2010 to \$230,500 in 2011. The value over the past decade, in real 2011 dollars, fluctuated from a high of \$228,800 in 2005 to a low of \$46,300 in 2002. These figures compare to the state average high of \$270,950 in 2000 and a low of \$184,110 in 2003. Additional details of permit activity and per unit valuations are given in Table II.22.25, on the following page.

The average sales price of existing, detached, single-family homes was provided by the Department of Revenue (DOR). In 2011, the average sales price in Washakie County was \$153,093. This represented an increase of 3.8 percent from the previous year. In contrast, Wyoming's average was \$241,301, a decrease of 3.8 percent over the previous year. A comparison of average sales prices between 1999 and 2011 is displayed in Table II.22.26, below.

<b>Table II.22.26</b> <b>Average Sales Prices</b> Washakie County vs. Wyoming DOR Data, 1999–2011				
Year	Washakie County Average Price (\$)	Washakie County Annual % Change	Wyoming Average Price	Wyoming Annual % Change
1999	80,338	1.14	101,517	4.76
2000	84,564	5.26	111,437	9.77

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in the semiannual report ending in December 2012.<sup>162</sup> During December 2012, a total of 24 surveys were completed in Washakie County. Of the 258 rental units surveyed, seven were vacant, indicating a vacancy rate of 2.33 percent, as shown in Table II.22.27, below. This rate compares to a 2.08 percent vacancy rate one year ago and a statewide December 2012 vacancy rate of 4.17 percent.

Year	Sample	Total Units	Vacant Units	Vacancy Rate
2001a	11	144	7	4.86%
2001b	8	126	12	9.52%
2002a	7	118	12	10.17%
2002b	8	160	10	6.25%
2003a	4	102	6	5.88%
2003b	6	112	7	6.25%
2004a	11	186	3	1.61%
2004b	8	180	2	1.11%
2005a	10	159	5	3.14%
2005b	13	249	4	1.61%
2006a	12	196	3	1.53%
2006b	16	266	0	0
2007a	14	196	2	1.02%
2007b	13	193	14	7.25%
2008a	17	191	7	3.66%
2008b	17	185	5	2.70%
2009a	18	182	7	3.85%

2010a	19	245	9	3.67%
2010b	19	258	13	5.04%
2011a	17	275	10	3.64%
2011b	23	337	7	2.08%
2012a	24	277	7	2.53%
2012b	24	258	6	2.33%

Diagram II.22.3, on the following page, shows the historical vacancy rate for Washakie County and Wyoming. As can be seen, the vacancy rate in Washakie County was above the statewide rate early in the decade, but except for a single spike in 2007, has remained below the statewide rate since 2004.

<sup>162</sup>Those signified as a in the “year” column of Table II.22.10 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

Diagram II.22.4, below, shows the average rent of single-family and apartment units in Washakie County. In the second half of 2012, average rents for single-family units rose, to \$677, and average rents for apartments rose to \$415.

The calendar year 2012 Housing Needs Assessment (HNA) Survey, conducted primarily over the phone by the Partnership using a sample from data provided by the WYDOT, had 27 respondents in Washakie County. Of the incoming persons who were unsatisfied with their current housing, 85.7 percent said they were seeking to own a home and the remaining 14.3 percent were seeking to rent. Of those seeking to own a home, 71.4 percent wished to buy existing units, of which 50 percent of respondents anticipated spending below \$100,000 and 50 percent anticipated spending between \$100,000 and \$249,999. Of those seeking to build a home, 100 percent anticipated spending between \$100,000 and \$249,999.

Of the 14.3 percent of respondents seeking to rent, 100 percent anticipated spending below \$474. Additional survey data are presented in **Volume II. Technical Appendix**.

**Housing Problems**

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2011 five-year ACS data, 70 or 2.0 percent of households in Washakie County were overcrowded and another 11 or 0.3 percent of units were severely overcrowded, as shown in Table II.22.28, below. This housing problem was far more prevalent in renter households as compared to owner households.

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2011 five-year ACS, a total of 107 units or 2.8 percent of all housing units in Washakie County were lacking complete kitchen facilities. This compared to 2.9 percent of households statewide without complete kitchen facilities. These data are presented in Table II.22.29, at right.

<b>Table II.22.29</b> <b>Housing Units with Incomplete Kitchen Facilities</b> Washakie County 2007-2011 Five-Year ACS Data		
<b>Facilities</b>	<b>Washakie County</b>	<b>State of Wyoming</b>
Complete Kitchen Facilities	3,711	251,420
Lacking Complete Kitchen Facilities	107	7,570
<b>Total Housing Units</b>	<b>3,818</b>	<b>258,990</b>
Percent Lacking	2.8%	2.9%

At the time of the 2011 ACS, a total of 58 units or 1.5 percent of all housing units in Washakie County were lacking complete plumbing facilities. This compared to 2.4 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.22.30, at right.

<b>Table II.22.30</b> <b>Housing Units with Incomplete Plumbing Facilities</b> Washakie County 2007-2011 Five-Year ACS Data		
<b>Facilities</b>	<b>Washakie County</b>	<b>State of Wyoming</b>

<b>Total Households</b>	<b>3,818</b>	<b>258,990</b>
Percent Lacking	1.5%	2.4%

The third type of housing problem reported in the 2011 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30 to 50 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Washakie County, 16.7 percent of households had a cost burden and 6.0 percent of households had a severe cost burden, which compared to 13.9 percent with a cost burden and 9.5 percent with a severe cost burden in the State of Wyoming. Roughly 23.8 percent of homeowners with a mortgage in Washakie County experienced a cost burden and 6.2 percent experienced a severe cost burden, while 15.3 percent of renters had a cost burden and 9.1 percent had a severe cost burden, as shown in Table II.22.31, on the following page.

## 2013 HOUSING NEEDS FORECAST

Three alternative housing forecasts were prepared: a *moderate growth* scenario, a *strong growth* scenario and a *very strong growth* scenario. While all three predictions are available in the *2013 Wyoming Housing Needs Forecast*, only the *strong growth* forecast is presented on the following page. The forecast of household formation by tenure was segmented by income as a percentage of Median Household Income (MHI). The income groupings for the counties were separated into five categories: 0 to 30 percent, 31 to 50 percent, 51 to 80 percent, 81 to 95 percent, and more than 95 percent of MHI.

The household forecast indicated a total increase of 1,326 households in Washakie County, from 3,492 in 2010 to 4,818 in 2040. Homeowners are expected to increase from 2,560 households in 2010 to 3,514 by 2040. Renters are anticipated to increase from 932 households in 2010 to 1,304 in 2040.

Homeownership from 2010 to 2040 is expected to increase by 68 households for homeowners with extremely low incomes or 30 percent or less of MHI. Homeownership for those with incomes from 31 to 50 percent of MHI is expected to increase by 93 households and by 158 for those with 51 to 80 percent of MHI.

Rental demand from the years 2010 to 2040 is expected to increase by 76 households for renters with extremely low incomes or 30 percent or less of MHI. Further, rental demand for those with 31 to 50 percent of MHI is expected to increase by 44 households over the period. Table II.22.32, on the following page, provides details of the household forecast by tenure and income.
