

## GOSHEN COUNTY

### Demographics

The Census Bureau's current census estimates indicate that Goshen County's population increased from 13,249 in 2010 to 13,383 in 2015, or by 1.0 percent. This compares to a statewide population growth of 4.0 percent over the period. The number of people from 25 to 44 years of age increased by 8.7 percent, and the number of people from 55 to 64 years of age increased by 5.1 percent. The white population decreased by 0.4 percent, while the black population increased by 68.2 percent. The Hispanic population increased from 1,288 to 1,369 people between 2010 and 2015 or by 6.3 percent. These data are presented in Table II.8.1, below.

At the time of the 2010 Census, there were 1,070 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters increased by 117.9 percent, as shown in Table II.8.3, below.

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial Census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year

<sup>104</sup> In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Table II.8.4, below, shows data on household type by tenure in the 2014 5-year ACS data. Household type is broken down by family households and non-family households. In 2014, there were an estimated 3,488 family households, of which 2,933 housed married couple families and 555 housed "other families." "Other family" is defined as either a male householder with no wife present, of whom there were 171 families, or a female householder with no husband present, of which there were 384 families. There were also an estimated 1,882 "non-family households," which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Goshen County was 65.0 percent, which compared to the statewide rate of 65.3 percent. Of the family households in Goshen County, 84.1 percent were married households, which compared to 79.8 percent in the State of Wyoming.

Family Type	Goshen County		State of Wyoming

Table II.8.5, on the following page, displays the 2014 5-year ACS census data for household type by household size. In 2013, there were 1,997 two-person family households, 663 three-person family households and 482 four-person family households. One-person non-family households made up 89.5 percent of all non-family households or an estimated 1,685 households. Goshen County's two persons households made up 40.8 percent of total housing units and four person households made up an additional 9.0 percent, which compares to 38.4 and 11.6 percent, respectively, for the State of Wyoming.

Table II.8.15, at right, shows the number of households in the county by number of bedrooms and tenure. There were 7 rental households with no bedrooms, otherwise known as studio apartments. Two-bedroom households accounted for 30.7 percent of total households in Goshen County, which compared to 24.4 percent statewide. In Goshen County, the 2,027 households with three bedrooms accounted for 37.7 percent of all households, and there were only 310 five-bedroom or more households, which accounted for 5.8 percent of all households.

The age of a structure influences its value. As shown in Table II.8.16, at right, structures built in 1939 or earlier had a median value of \$87,100, while structures built between 1950 and 1959 had a median value of \$126,800 and those built between 1990 to 1999 had a median value of \$209,000. The newest structures tended to have the highest values and those built between 2000 and 2009 and from 2010 or later had median values of \$250,000 and \$191,700, respectively. The total average median value in Goshen County was \$147,600, which compared to \$189,300 in the State of Wyoming.

<b>Table II.8.16</b> <b>Median Value by Year Structure Built</b> Goshen County 2010-2014 5-Year ACS Data		
Year Built	Goshen County	State of Wyoming
1939 or earlier	87,100	153,700

**Economics**

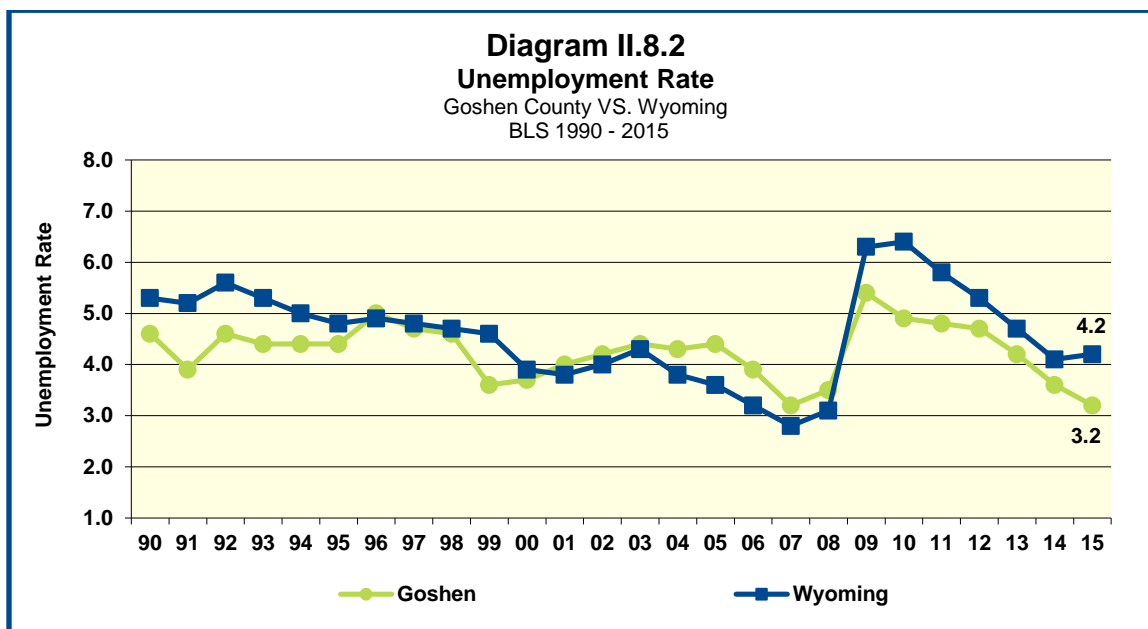

The HUD estimated MFI for Goshen County was \$53,300 in 2016.<sup>105</sup> This figure compares to Wyoming’s MFI of \$73,300. Diagram II.8.1, below, illustrates the estimated MFI for 2000 through 2016.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Goshen County’s labor force, defined as the number of persons working or actively seeking work, increased by 46 persons, from 7,153 in 2014 to 7,199 in 2015. Employment increased by 73

<sup>105</sup> Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

persons; unemployment decreased by 27 persons; and the unemployment rate, the number of unemployed persons as a percentage of the labor force, decreased from 3.6 percent in 2014 to 3.2 percent in 2015, as shown below in Diagram II.8.2.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. Data from this series are from the period of January 2005 through December 2015 and are presented in Table II.8.20, below, with the 2015 information considered preliminary (p). As shown therein, total annual employment stood at 4,506 persons in 2015; this figure was lower than the 2014 average by 15 jobs.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2014, the most recent year for which data are available, Goshen County recorded 7,401 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$549,208,000, and real per capita income was \$40,640 in 2014. This compares to a statewide average real per capita income of \$54,584. The average earnings per job in the county was \$39,557 in 2014, while Wyoming average earnings per job was \$53,171. These data are presented in full in **Volume II. Technical Appendix.**

**Housing**

Real average apartment rent in Goshen County decreased from \$584 in fourth quarter 2014 to \$548 in fourth quarter 2015, or by 6.1 percent. Detached single-family home rents increased by 4.2 percent and mobile home lots decreased by 0.6 percent.

Goshen County rental prices experienced average annualized increases of 1.3 percent for apartments, 0.7 percent for houses, and 0.9 percent for mobile home lots since second quarter 1998 through fourth quarter 2015.<sup>106</sup> These figures compare to state average annualized increases in rental prices of 1.0 percent for apartments, 1.4 percent for houses, 1.1 percent for mobile homes plus a lot, and 0.9 percent for mobile home lots. Table II.8.23, above, presents the Goshen County data for each rental type.<sup>107</sup>

<sup>106</sup> Data from 1986 to 1997 for Goshen County was not reported by the Wyoming Economic Analysis Division.

<sup>107</sup> Apartments are two-bedroom units, excluding gas and electricity. Mobile home lots are single-wide units and include water costs. Houses are for two- or three-bedroom dwelling units, excluding gas and electricity. A mobile home on a lot includes a combined rent for mobile home and lot.

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Goshen County increased from 1 authorizations in 2014 to 4 in 2015.

The real value of single-family building permits increased from \$242,387 in 2014 to \$293,875 in 2015. This compares to an increase in permit value statewide, with values rising from \$298,797 in 2014 to \$348,576 in 2015. Additional details are given in Table II.8.24, below.

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in June 2016.<sup>108</sup> During June 2016, a total of 32 surveys were completed by property managers in Goshen County. Of the 420 rental units surveyed, 39 were vacant, indicating a vacancy rate of 9.3 percent, as shown in Table II.8.26, below. The vacancy rate one year ago was 4.1 percent. In June 2016, the statewide vacancy rate was 8.6 percent.

Diagram II.8.3, on the following page, shows the historical vacancy rate for Goshen County and Wyoming. As can be seen, the vacancy rate in Goshen County was higher than the statewide rate until 2008, after which it fell below the statewide rate to a low of 1.4 in 2012. In December 2016, the vacancy rate remained above the statewide rate.

<b>Table II.8.26</b> <b>Total Units, Vacant Units, and Vacancy Rate</b> Goshen County RVS Data, June 2001–June 2016

<sup>108</sup>Those signified as a in the “year” column of Table II.8.11 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

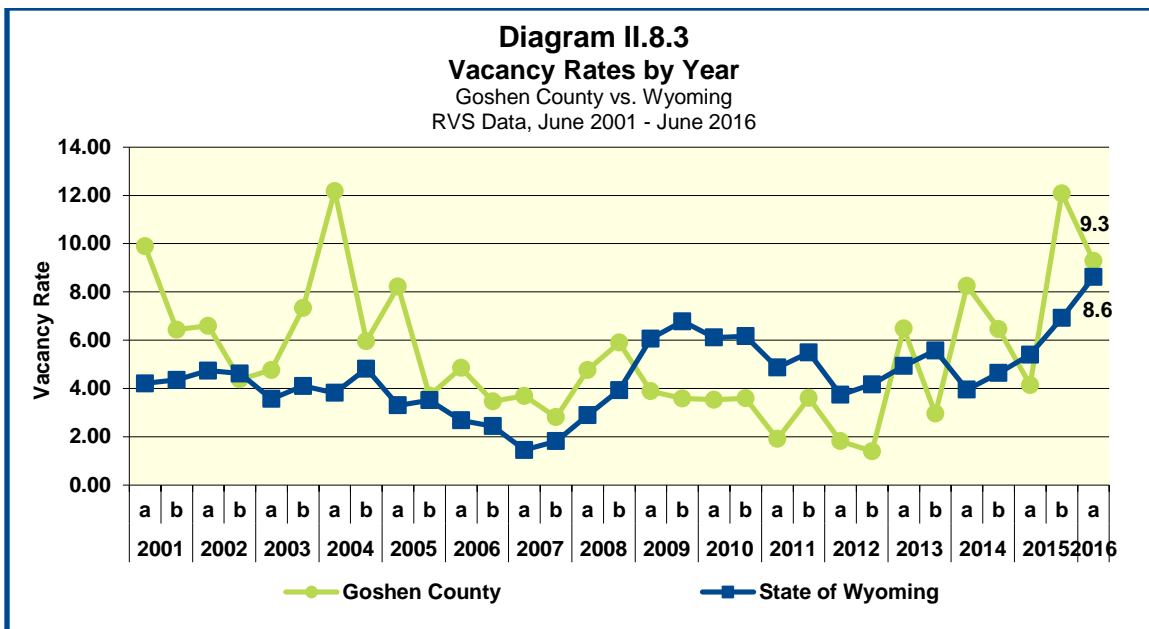

Diagram II.8.4, below, shows the average rent of single-family and apartment units in Goshen County. In 2016, average rents for single-family units increased to \$610 and average rents for apartments rose to \$536.

Table II.8.27 below shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 71 single family units in Goshen County, with 4 of them available. This translates into a vacancy rate of 5.6 percent in Goshen County, which compares to a single family vacancy rate of 7.0 percent for the State of Wyoming. There were 317 apartment units reported in the survey, with 33 of them available, which resulted in a vacancy rate of 10.4 percent. This compares to a statewide vacancy rate of 7.9 percent for apartment units across the state.

<b>Table II.8.27</b>

Average market-rate rents by unit type are shown in Table II.8.31, below. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

<b>Table II.8.31</b>

Table, II.8.40, on the following page, shows the most common answers from the 2016 fiscal year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Goshen County had a total of 21 respondents, with an average persons per household of 3.7 people. Of new residents to Goshen County, 66.7 percent were married and the most common age group arriving in the state was 35 to 44 years old. Most new residents moved to be closer to friends or relatives.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 42.9 percent of respondents owning thier residence. The average mortgage payment in Goshen County was \$600 and the average rent was \$618. When asked if they were satisfied with their current housing, 81.0 percent said they were satisfied with thier current housing.

<b>Table II.8.40</b> <b>Most Replied Response</b> Goshen County HNA Survey: Fiscal Year 2016	
Question	Most Replied Answer (%)
<b>Demographics</b>	
Total Number of Respondents	21
Number of persons in household (Average)	3.7
Current age	35 to 44 years old (38.9%)
Marital status	Married (66.7%)
Primary reason for moving to Wyoming	Friends or relatives in Wyoming (42.9%)
In which industry are you primarily employed	Other (38.1%)
Highest education level completed	Some College (19.0%)
Total household income from all sources	\$50,000 to \$74,999 dollars (37.5%)
<b>Current Housing Characteristics</b>	
Current Residence	Single family home (81.0%)
Do you own or rent	Own (42.9%)
How many bedrooms (Average)	3.2
How many full bathrooms (Average)	1.9
Average mortgage payment	\$600
Average rental payment	\$618
Are you satisfied with your current housing	Satisfied with current housing (81.0%)

Additional survey data are presented in **Volume II. Technical Appendix**<sup>109</sup>.

### Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2014 5-year ACS data, 20 or .4 percent of households in Goshen County were overcrowded and another 12 or .2 percent of units were severely overcrowded, as shown in Table II.8.41, on the following page. This housing problem was far more prevalent in renter households as compared to owner households.

<sup>109</sup> Percentages presented here may vary slightly from those in the technical appendix. This is because the percentages here are calculated with the missing responses excluded, where the percentages calculated in the technical appendix include all responses, even if they are missing.

<b>Table II.8.41</b>

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2014 5-year ACS, a total of 168 units or 2.8 percent of all housing units in Goshen County were lacking complete kitchen facilities. This compared to 2.6 percent of households statewide without complete kitchen facilities. These data are presented in Table II.8.42, at right.

<b>Table II.8.42</b>		
<b>Housing Units with Incomplete Kitchen Facilities</b>		
Goshen County		
2010-2014 5-Year ACS Data		
Facilities	Goshen County	State of Wyoming
Complete Kitchen Facilities	5,800	258,329
Lacking Complete Kitchen Facilities	168	6,866
<b>Total Housing Units</b>	<b>5,968</b>	<b>265,195</b>
Percent Lacking	2.8%	2.6%

At the time of the 2014 ACS, a total of 154 units or 2.6 percent of all housing units in Goshen County were lacking complete plumbing facilities. This compared to 2.2 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.8.43, below.

<b>Facilities</b>	<b>Goshen County</b>	<b>State of Wyoming</b>
Complete Plumbing Facilities	5,814	259,378
Lacking Complete Plumbing Facilities	154	5,817
<b>Total Households</b>	<b>5,968</b>	<b>265,195</b>
Percent Lacking	2.6%	2.2%

The third type of housing problem reported in the 2014 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Goshen County, 13.0 percent of households had a cost burden and 8.6 percent of households had a severe cost burden, which compared to 14.4 percent with a cost burden and 9.8 percent with a severe cost burden in the State of Wyoming. Roughly 16.0 percent of homeowners with a mortgage in Goshen County experienced a cost burden and 12.6 percent experienced a severe cost burden, while 17.2 percent of renters had a cost burden and 10.5 percent had a severe cost burden, as seen in Table II.8.44, on the following page.

### 2016 WCDA Loan Profile

The Wyoming Community Development Authority (WCDA) began purchasing home loans in 1978 to provide affordable housing in Wyoming. There were a total of 658 loans purchased in Goshen County between 1979 and 2016, with 12 occurring in fiscal 2016. The average home size over the period was 1,205 square feet and 1,341 square feet in fiscal 2016. For homes receiving a WCDA loan in fiscal 2016, the average year a home was built was 1954. The average household income in fiscal 2016 in nominal terms, without the effects of inflation being taken into consideration, was \$53,615. The average purchase price in fiscal 2016 was \$114,667. In fiscal 2016, 0.0 percent of loans purchased were for new construction, and 33.3 percent had female heads of household. Fiscal year data for the entire operating history of the WCDA can be found in **Volume II. Technical Appendix.**
