

TETON COUNTY

Demographics

The Census Bureau's current census estimates indicate that Teton County's population increased from 21,294 in 2010 to 23,125 in 2015, or by 8.6 percent. This compares to a statewide population growth of 4.0 percent over the period. The number of people from 25 to 44 years of age increased by 7.7 percent, and the number of people from 55 to 64 years of age increased by 14.0 percent. The white population increased by 7.4 percent, while the black population increased by 185.2 percent. The Hispanic population increased from 3,191 to 3,473 people between 2010 and 2015 or by 8.8 percent. These data are presented in Table II.20.1, below.

Table II.20.2, on the following page, presents the population of Teton County by age and gender from the 2010 Census and 2015 current census estimates. The 2010 Census count showed a total of 11,191 males, who accounted for 52.6 percent of the population, and the remaining 47.4 percent, or 10,103 persons, were female. In 2015, the number of males rose to 11,940 persons, and accounted for 51.6 percent of the population, with the remaining 48.4 percent, or 11,185 persons being female.

At the time of the 2010 Census, there were 271 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters increased by 99.3 percent, as shown in Table II.20.3, below.

Table II.20.3 Group Quarters Population Teton County 2000 SF1 and 2010 Census Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial Census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year

¹⁶¹ In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Table II.20.4, below, shows data on household type by tenure in the 2014 5-year ACS data. Household type is broken down by family households and non-family households. In 2014, there were an estimated 4,831 family households, of which 4,163 housed married couple families and 668 housed "other families." "Other family" is defined as either a male householder with no wife present, of whom there were 174 families, or a female householder with no husband present, of which there were 494 families. There were also an estimated 3,042 "non-family households," which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Teton County was 61.4 percent, which compared to the statewide rate of 65.3 percent. Of the family households in Teton County, 86.2 percent were married households, which compared to 79.8 percent in the State of Wyoming.

Table II.20.5, on the following page, displays the 2014 5-year ACS census data for household type by household size. In 2013, there were 2,491 two-person family households, 1,071 three-person family households and 868 four-person family households. One-person non-family households made up 65.4 percent of all non-family households or an estimated 1,990 households. Teton County's two persons households made up 41.1 percent of total housing units and four person households made up an additional 12.4 percent, which compares to 38.4 and 11.6 percent, respectively, for the State of Wyoming.

The age of a structure influences its value. As shown in Table II.20.16, at right, structures built in 1939 or earlier had a median value of \$285,800, while structures built between 1950 and 1959 had a median value of \$120,700 and those built between 1990 to 1999 had a median value of \$773,700. The newest structures tended to have the highest values and those built between 2000 and 2009 and from 2005 or later had median values of \$731,200 and \$, respectively. The total average median value in Teton County was \$675,000, which compared to \$189,300 in the State of Wyoming.

Table II.20.16 Median Value by Year Structure Built Teton County 2010-2014 5-Year ACS Data		
Year Built	Teton County	State of Wyoming
1939 or earlier	285,800	153,700
1940 to 1949	229,200	140,900

2000 to 2009	731,200	252,800
Built 2010 or Later		258,900
Total	675,000	189,300

Household mortgage status is reported in Table II.20.17, below. In Teton County, households with a mortgage accounted for 65.8 percent of all households or 3,057 housing units, and the remaining 34.2 percent or 1,587 units had no mortgage. Of those units with a mortgage, 548 had either a second mortgage or home equity loan, 34 had both a second mortgage and home equity loan, and 2,475 or 81.0 percent had no second mortgage or no home equity loan.

Table II.20.17 Mortgage Status Teton County 2010-2014 5-Year ACS Data				
Mortgage Status	Teton County		State of Wyoming	
	Households	% of Households	Households	% of Households
Housing units with a mortgage, contract to purchase, or similar debt	3,057	65.8%	92,688	59.3%
With either a second mortgage or home equity loan, but not both	548	17.9%	12,104	13.1%

Economics

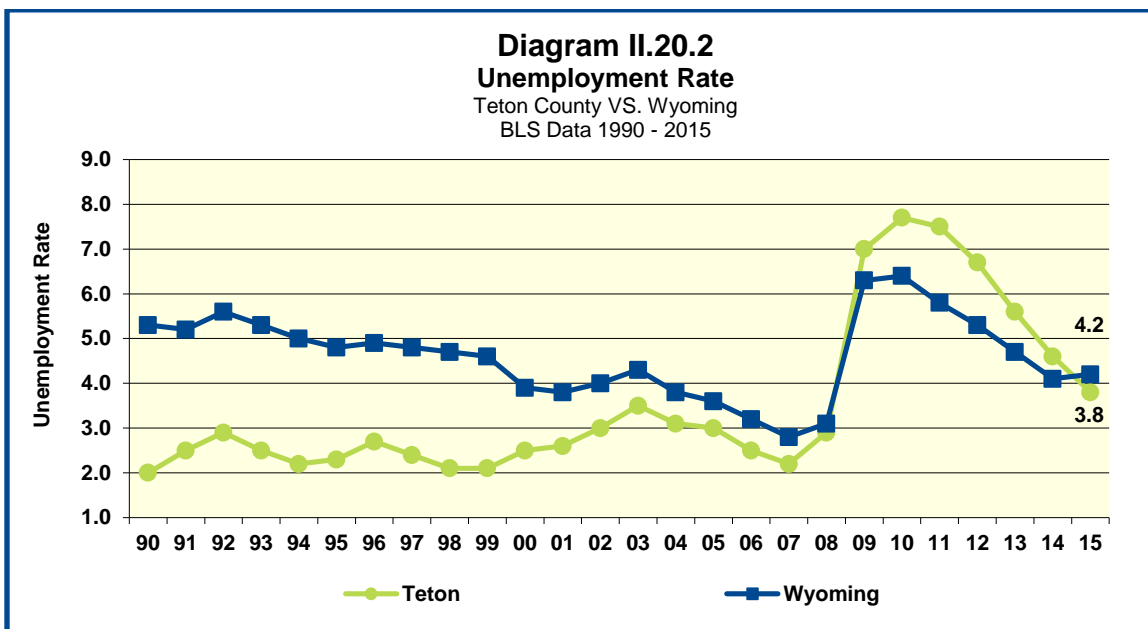

The HUD estimated MFI for Teton County was \$85,800 in 2016.¹⁶² This compares to Wyoming’s MFI of \$73,300. Diagram II.20.1, below, illustrates the estimated MFI for 2000 through 2016.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Teton County’s labor force, defined as the number of persons working or actively seeking work, increased by 309 persons, from 14,462 in 2014 to 14,771 in 2015. Employment increased by 421 persons;

¹⁶² Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

unemployment decreased by 112 persons; and the unemployment rate, or the number of unemployed persons as a percentage of the labor force, decreased from 4.6 percent in 2014 to 3.8 percent in 2015, as shown below in Diagram II.20.2.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. Data from this series are from the period of January 2005 through December 2015 and are presented in Table II.20.20, below, with the 2015 information considered preliminary (p). As shown therein, total annual employment stood at 19,488 persons in 2015; this figure was higher than the 2014 average by 652 jobs.

The QCEW also reports average weekly wages, which represents total compensation paid during the calendar quarter, regardless of when services were performed. The BLS QCEW data indicated average weekly wages were \$817 in 2014. In 2015, average weekly wages saw a decrease of 0.12 over the prior year, rising to \$816. These data are shown in Table II.20.21, below.

Table II.20.21 Average Weekly Wages Teton County BLS QCEW Data, 2001–2015(p)						
Year	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Annual	% Change
2001	513	491	497	700	544

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2014, the most recent year for which data are available, Teton County recorded 29,327 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$4,459,532,000, and real per capita income was \$194,485 in 2014. This compares to a statewide average real per capita income of \$54,584. The average earnings per job in the county was \$45,989 in 2014, while Wyoming average earnings per job was \$53,171. These data are presented in full in **Volume II. Technical Appendix.**

Housing

According to the Wyoming cost of living index, real average apartment rent in Teton County increased from \$1,293 in fourth quarter 2014 to \$1,654 in fourth quarter 2015, or by 27.9 percent. Detached single-family home rents increased by 5.3 percent, rents for mobile homes on a lot increased by 2.5, and rents for mobile home lots increased by 0.4 percent.

Teton County rental prices experienced average annualized increases of 3.1 percent for apartments, 3.3 percent for houses, 1.5 percent for mobile homes plus a lot, and 2.4 percent for mobile home lots since fourth quarter 1986 through fourth quarter 2015. These figures compare to state average annualized increases in rental prices of 1.0 percent for apartments, 1.4 percent for houses, 1.1 percent for mobile homes plus a lot, and 0.9 percent for mobile home lots over the same period. Table II.20.23, at right, presents the Teton County data for each rental type.¹⁶³

¹⁶³ Apartments are two-bedroom units, excluding gas and electricity. Mobile home lots are single-wide units and include water costs. Houses are for two- or three-bedroom dwelling units, excluding gas and electricity. A mobile home on a lot includes a combined rent for mobile home and lot.

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Teton County increased from 135 authorizations in 2014 to 174 in 2015.

The real value of single-family building permits increased from \$964,794 in 2014 to \$1,346,000 in 2015. This compares to an increase in permit value statewide, with values rising from \$298,797 in 2014 to \$348,576 in 2015. Additional details are given in Table II.20.24, below.

The average sales price of existing, detached, single-family homes was provided by the Department of Revenue (DOR). In 2015, the average sales price in Teton County was \$1,625,841. This represented an increase of 10.4 percent from the previous year. In contrast, Wyoming’s average was \$275,611, an increase of 4.6 percent over the previous year. A comparison of average sales prices between 2000 and 2015 is displayed in Table II.20.25, on the following page.

The Jackson Hole real estate association also releases a housing market report for Jackson Hole.¹⁶⁴ In the first half of 2016 the number of sales decreased by 14.0 percent, compared to the first half of 2015. However, this decrease was due to a falling off of post-recession recovery and is a return to a more stable equilibrium. Within the single family market, the number of transactions decreased by almost 5.0 percent, and the median sales price of a single family home fell by 5.0 percent. The condo and townhome market also fell by 10 percent in transaction volume since 2015, and has median sale prices decreased by 10.0 percent. The luxury market also remains strong with 23 sales of over 3 million dollars.

Table II.20.25 Average Sales Prices Teton County vs. Wyoming DOR Data, 1999–2015

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent conducted in June 2016.¹⁶⁵ During June 2016, a total of 66 surveys were completed by property managers in Teton County. Of the 1,365 rental units surveyed, 14 were vacant, indicating a vacancy rate of 1.0 percent, as shown in Table II.20.26, on the following page. This rate compares to a 0.7 percent vacancy rate one year ago and a statewide June 2016 vacancy rate of 8.6 percent.

¹⁶⁴ https://issuu.com/jhrea/docs/jh_market_report_2016midyear

¹⁶⁵ Those signified as a in the “year” column of Table II.20.10 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

Diagram II.20.3, below, shows the historical vacancy rate for Teton County and Wyoming. As can be seen, over the period from 2001 to 2008 the vacancy rate in Teton County has been similar to the statewide vacancy rate, until it began to rise and jumped to a high of 16.9 percent in the first half of 2010. However, since then, the vacancy rate has been below the statewide rate, with a rate of 1.0 percent in June 2016.

Diagram II.20.4, below, shows the average rent of single-family and apartment units in Teton County. In 2016, rents for single-family units fell to \$2,214 and average rents for apartments fell to \$1,397.

Table II.20.27 below shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 60 single family units in Teton County, with 3 of them available. This translates into a vacancy rate of 5.0 percent in Teton County, which compares to a single family vacancy rate of 7.0 percent for the State of Wyoming. There were 985 apartment units reported in the survey, with 10 of them available, which resulted in a vacancy rate of 1.0 percent. This compares to a statewide vacancy rate of 7.9 percent for apartment units across the state.

Place	Total Units	Vacant Units	Vacancy Rate
Single Family	60	3	5.0%
Duplex units	17	0	.0%
Apartments	985	10	1.0%
Mobile Homes	1	1	100.0%
"Other" Units	8	0	.0%
Don't Know	294	0	.0%
Total	1,365	14	1.0%

Table II.20.28 below reports units by bedroom size. Three bedroom units were the most common type of reported single family unit, with 18 units. The most common apartment units were efficiency units, with 174 units. Additional details of unit types by bedrooms are reported below.

Table II.20.28							
Rental Units by Bedroom Size							
Teton County							
RVS Data, June 2016							
Number of Bedrooms	Single Family Units	Duplex Units	Apartment Units	Mobile Homes	“Other” Units	Don’t Know	Total
Efficiency	0	0	174	0	0	.	174
One	5	3	161	0	1	.	170

Average market-rate rents by unit type are shown in Table II.20.31, below. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

Table II.20.31						
Average Market Rate Rents by Bedroom Size						
Teton County

Table II.20.34, below, shows the condition of rental units by unit type for Teton County. Respondents could rate their units from poor to excellent, however many respondents did not know, or did not wish to comment on the condition of their units. As reported below, most single family units were in good condition, with most apartments being in good condition. Details by unit type and condition are displayed below.

Table II.20.34							
Condition by Unit Type							
Teton County							
RVS Data, June 2016							
Conditions	Single Family Units	Duplex Units	Apartment Units	Mobile Homes	“Other” Units	Don’t Know	Total

Table, II.20.38, on the following page, shows the most common answers from the 2016 fiscal year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Teton County had a total of 35 respondents, with an average persons per household of 2.4 people. Of new residents to Teton County, 53.3 percent were married and the most common age group arriving in the state was 25 to 34 years old. Most new residents moved for reasons other than those given in the survey.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 45.7 percent of respondents renting their residence. The average mortgage payment in Teton County was \$1,700 and the average rent was \$1,202. When asked if they were satisfied with their current housing, 71.4 percent said they were satisfied with thier current housing.

Table II.20.38 Most Replied Response Teton County HNA Survey: Fiscal Year 2016	
Question	Most Replied Answer (%)
Demographics	
Total Number of Respondents	35
Number of persons in household (Average)	2.4
Current age	25 to 34 years old (38.7%)
Marital status	Married (53.3%)
Primary reason for moving to Wyoming	Other reason (34.3%)
In which industry are you primarily employed	Other (22.9%)
Highest education level completed	College Graduate (37.1%)
Total household income from all sources	\$50,000 to \$74,999 dollars (33.3%)
Current Housing Characteristics	
Current Residence	Single family home (62.9%)
Do you own or rent	Rent (45.7%)
How many bedrooms (Average)	2.9
How many full bathrooms (Average)	2.1
Average mortgage payment	\$1,700
Average rental payment	\$1,202
Are you satisfied with your current housing	Satisfied with current housing (71.4%)
Housing Demand (if unsatisfied with current housing)	
Reason you are unsatisfied	Rent or mortgage is too high (40.0%)
Are you seeking to change your housing situation	Seeking different housing (66.7%)
What type of unit are you seeking	Single family home (50.0%)
Type of tenure seeking	Seeking to rent (66.7%)
If own, do you plan on building or buying	Buy an existing unit (100.0%)
Expected buying price	.
Expected building price	\$200,000 to \$249,999 dollars (100.0%)
Expected rental price	\$701 to \$800 dollars (100.0%)

For residents who are unsatisfied with their current housing, 40.0 percent were unsatisfied because the rent or mortgage is too high. When asked what type of unit they were seeking, the most common response, 50.0 percent, indicated they were seeking a single family home. When asked if they preferred to own or rent, 33.3 percent wanted to buy and 66.7 wanted to rent their next residence. Most residents wishing to build a house anticipated spending between \$200,000 to \$249,999 dollars. Of those respondents who wished to rent, the most common response, 100.0 percent of respondents, anticipated spending \$701 to \$800 dollars. Additional survey data are presented in **Volume II. Technical Appendix.**¹⁶⁶

Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2014 5-year ACS data, 183 or 2.3 percent of households in Teton County were overcrowded and another 173 or 2.2 percent of units were severely overcrowded, as shown in Table II.20.39, below. This housing problem was far more prevalent in renter households as compared to owner households.

¹⁶⁶ Percentages presented here may vary slightly from those in the technical appendix. This is because the percentages here are calculated with the missing responses excluded, where the percentages calculated in the technical appendix include all responses, even if they are missing.

Table II.20.39

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2014 5-year ACS, a total of 354 units or 2.7 percent of all housing units in Teton County were lacking complete kitchen facilities. This compared to 2.6 percent of households statewide without complete kitchen facilities. These data are presented in Table II.20.40, at right.

Table II.20.40		
Housing Units with Incomplete Kitchen Facilities		
Teton County		
2010-2014 5-Year ACS Data		
Facilities	Teton County	State of Wyoming
Complete Kitchen Facilities	12,680	258,329
Lacking Complete Kitchen Facilities	354	6,866
Total Housing Units	13,034	265,195
Percent Lacking	2.7%	2.6%

At the time of the 2014 ACS, a total of 220 units or 1.7 percent of all housing units in Teton County were lacking complete plumbing facilities. This compared to 2.2 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.20.41, below.

Table II.20.41 Housing Units with Incomplete Plumbing Facilities Teton County 2010-2014 5-Year ACS Data		
Facilities	Teton County	State of Wyoming
Complete Plumbing Facilities	12,814	259,378
Lacking Complete Plumbing Facilities	220	5,817
Total Households	13,034	265,195
Percent Lacking	1.7%	2.2%

The third type of housing problem reported in the 2014 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Teton County, 21.1 percent of households had a cost burden and 13.1 percent of households had a severe cost burden, which compared to 14.4 percent with a cost burden and 9.8 percent with a severe cost burden in the State of Wyoming. Roughly 20.8 percent of homeowners with a mortgage in Teton County experienced a cost burden and 13.4 percent experienced a severe cost burden, while 30.1 percent of renters had a cost burden and 14.6 percent had a severe cost burden, as seen in Table II.20.42, on the following page.

Table II.20.42 Cost Burden and Severe Cost Burden by Tenure Teton County 2010-2014 5-Year ACS Data
