

## UINTA COUNTY

### Demographics

The Census Bureau's current census estimates indicate that Uinta County's population decreased from 21,118 in 2010 to 20,822 in 2015, or by 1.4 percent. This compares to a statewide population growth of 4.0 percent over the period. The number of people from 25 to 44 years of age decreased by 3.7 percent, and the number of people from 55 to 64 years of age increased by 14.2 percent. The white population decreased by 2.6 percent, while the black population increased by 154.0 percent. The Hispanic population increased from 1,855 to 1,889 people between 2010 and 2015 or by 1.8 percent. These data are presented in Table II.21.1, below.

Table II.21.2, on the following page, presents the population of Uinta County by age and gender from the 2010 Census and 2015 current census estimates. The 2010 Census count showed a total of 10,662 males, who accounted for 50.5 percent of the population, and the remaining 49.5 percent, or 10,456 persons, were female. In 2015, the number of males rose to 10,473 persons, and accounted for 50.3 percent of the population, with the remaining 49.7 percent, or 10,349 persons being female.

At the time of the 2010 Census, there were 270 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters decreased by 24.6 percent, as shown in Table II.21.3, below.

<b>Table II.21.3</b> <b>Group Quarters Population</b> Uinta County 2000 SF1 and 2010 Census Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year

<sup>168</sup> In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Table II.21.4, below, shows data on household type by tenure in the 2015 5-year ACS data. Household type is broken down by family households and non-family households. In 2014, there were an estimated 5,345 family households, of which 4,310 housed married couple families and 1,035 housed "other families." "Other family" is defined as either a male householder with no wife present, of whom there were 176 families, or a female householder with no husband present, of which there were 859 families. There were also an estimated 2,157 "non-family households," which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Uinta County was 71.2 percent, which compared to the statewide rate of 64.9 percent. Of the family households in Uinta County, 80.6 percent were married households, which compared to 79.7 percent in the State of Wyoming.

Table II.21.5, on the following page, displays the 2015 5-year ACS census data for household type by household size. In 2015, there were 2,170 two-person family households, 1,202 three-person family households and 1,145 four-person family households. One-person non-family households made up 84.7 percent of all non-family households or an estimated 1,826 households. Uinta County's two persons households made up 33.2 percent of total housing units and four person households made up an additional 15.4 percent, which compares to 38.2 and 11.3 percent, respectively, for the State of Wyoming.

Table II.21.12, on the following page, presents the breakdown of households by unit type and tenure. Between 2010 and 2015, Uinta County saw an average of 4,258 owner-occupied single-family units compared to 621 single-family rental units. In Uinta County, single-family units comprised 65.0 percent of all households compared with 71.8 percent statewide. Uinta County

had a total of 565 apartment rental units and total apartment units accounted for 8.1 percent of all households. In the State of Wyoming, apartment units accounted for 8.7 percent of total households. There were also an estimated 1,698 mobile homes in Uinta County, which comprised 22.6 percent of all occupied housing units and compared to 12.9 statewide.

Table II.21.13, below, shows the number of households by year of construction. As shown, 11.1 percent, or 832 units, were built in 1939 or earlier in the county, and another 162 percent were built between 1940 and 1949. The number of households built between 2000 and 2009 was 870, which accounted for 11.6 percent of all households, and an additional 85 households, or 1.1 percent, were built in 2010 or later. These figures compare to 6,389 households, or 2.8 percent, that were built from 2010 or later statewide.

Table II.21.15, at right, shows the number of households in the county by number of bedrooms and tenure. There were 34 rental households with no bedrooms, otherwise known as studio apartments. Two-bedroom households accounted for 25.4 percent of total households in Uinta County, which compared to 24.3 percent statewide. In Uinta County, the 2,931 households with three bedrooms accounted for 39.1 percent of all households, and there were only 733 five-bedroom or more households, which accounted for 9.8 percent of all households.

The age of a structure influences its value. As shown in Table II.21.16, at right, structures built in 1939 or earlier had a median value of \$162,300, while structures built between 1950 and 1959 had a median value of \$184,400 and those built between 1990 to 1999 had a median value of \$172,800. The newest structures tended to have the highest values and those built between 2010 and 2013 had a median value of \$300,000. The total average median value in Uinta County was \$176,700, which compared to \$194,800 in the State of Wyoming.

<b>Table II.21.16</b> <b>Median Value by Year Structure Built</b> Uinta County 2010-2015 5-Year ACS Data

Household mortgage status is reported in Table II.21.17, below. In Uinta County, households with a mortgage accounted for 55.1 percent of all households or 3,018 housing units, and the remaining 44.9 percent or 2,462 units had no mortgage. Of those units with a mortgage, 319 had either a second mortgage or home equity loan, 27 had both a second mortgage and home equity loan, and 2,672 or 88.5 percent had no second mortgage or no home equity loan.

**Economics**

The HUD estimated MFI for Uinta County was \$75,000 in 2016.<sup>169</sup> This compares to Wyoming’s MFI of \$73,300. Diagram II.21.1, below, illustrates the estimated MFI for 2000 through 2016.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Uinta County’s labor force, defined as the number of persons working or actively seeking work, decreased by 156 persons, from 9,901 in 2014 to 9,745 in 2015. Employment decreased by 155 persons;

<sup>169</sup> Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

unemployment decreased by one person; and the unemployment rate, or the number of unemployed persons as a percentage of the labor force, increased from 4.8 percent in 2014 to 4.9 percent in 2015, as shown below in Diagram II.21.2.

The BLS produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Data from this series are from the period of January 2005 through June 2016 and are presented in Table II.21.20, below, with the 2016 information considered preliminary (p). As shown therein, total annual employment stood at 8,720 persons in 2015; this figure was lower than the 2014 average by 179 jobs. In June total preliminary monthly employment was estimated to be 8,376 jobs.

The QCEW also reports average weekly wages, which represents total compensation paid during the calendar quarter, regardless of when services were performed. The BLS QCEW data indicated average weekly wages were \$808 in 2014. In 2015, average weekly wages saw a decrease of -1.98 over the prior year, rising to \$792. The most recent preliminary estimates show average weekly wages were 749 in the second quarter on 2016. These data are shown in Table II.21.21, below.

<b>Table II.21.21</b> <b>Average Weekly Wages</b> Uinta County BLS QCEW Data, 2001–2016(p)

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2015, the most recent year for which data are available, Uinta County recorded 12,180 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$853,804,000, and real per capita income was \$41,005 in 2015. This compares to a statewide average real per capita income of \$56,081. The average earnings per job in the county was \$44,755 in 2015, while Wyoming average earnings per job was \$53,875. These data are presented in full in **Volume II. Technical Appendix.**

**Housing**

According to the Wyoming Cost of Living Index, real average apartment rent in Uinta County decreased from \$606 in second quarter 2015 to \$601 in second quarter 2016, or by 0.8 percent. Detached single-family home rents decreased by 2.0 percent, rents for mobile homes on a lot decreased by 3.7 percent, and rents for mobile home lots increased by 3.1 percent.

Uinta County rental prices experienced an average annualized decreases of 0.1 percent for apartments and 0.1 percent for mobile home lots, with increases of 0.1 percent for houses between fourth quarter 1986 through second quarter 2016. These figures compare to state average annualized increases in rental prices of 0.9 percent for apartments, 1.3 percent for houses, 1.1 percent for mobile homes plus a lot, and 0.9 percent for mobile home lots over the same period. Table II.21.23, at right, presents the Uinta County data for each rental type.<sup>170</sup>

<sup>170</sup> Apartments are two-bedroom units, excluding gas and electricity. Mobile home lots are single-wide units and include water costs. Houses are for two- or three-bedroom dwelling units, excluding gas and electricity. A mobile home on a lot includes a combined rent for mobile home and lot.

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Uinta County increased from 34 authorizations in 2014 to 35 in 2015.

The real value of single-family building permits decreased from \$248,305 in 2014 to \$224,484 in 2015. This compares to an increase in permit value statewide, with values rising from \$298,797 in 2014 to \$348,576 in 2015. Additional details are given in Table II.21.24, below.

The average sales price of existing, detached, single-family homes was provided by the Department of Revenue (DOR). In 2015, the average sales price in Uinta County was \$209,625. This represented an increase of 2.2 percent from the previous year. In contrast, Wyoming’s weighted average was \$275,611, an increase of 4.6 percent over the previous year. A comparison of average sales prices between 2000 and 2015 is displayed in Table II.21.25, on the following page.

<b>Table II.21.25</b> <b>Average Sales Prices</b> Uinta County vs. Wyoming DOR Data, 2000–2015

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in the semiannual report ending in December 2016.<sup>171</sup> During December 2016, a total of 45 surveys were completed by property managers in Uinta County. Of the 886 rental units surveyed, 123 were vacant, for a vacancy rate of 13.9 percent, as shown in Table II.21.26, at right. This rate compares to an 15.4 percent vacancy rate one year ago, and a statewide December 2016 vacancy rate of 11.1 percent.

Diagram II.21.3, on the following page, shows the historical vacancy rate for Uinta County and Wyoming. As can be seen, the vacancy rate in Uinta County was above the statewide rate, except for the period between 2005 and 2008, when the vacancy rate hovered around zero.

<b>Table II.21.26</b> <b>Total Units, Vacant Units, and Vacancy Rate</b> Uinta County RVS Data, June 2001– December 2016

<sup>171</sup>Those signified as a in the “year” column of Table II.21.10 are conducted in June/July of each year. Those signified as b are conducted each November/December.

Diagram II.21.4, below, shows the average rent of single-family and apartment units in Uinta County. In 2016, average rents for single-family units decreased to \$786 and average rents for apartments rose to \$634.

Table II.21.27 below shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 31 single family units in Uinta County, with 5 of them available. This translates into a vacancy rate of 16.1 percent in Uinta County, which compares to a single family vacancy rate of 6.6 percent for the State of Wyoming. There were 466 apartment units reported in the survey, with 61 of them available, which resulted in a vacancy rate of 13.1 percent. This compares to a statewide vacancy rate of 9.8 percent for apartment units across the state.

Average market-rate rents by unit type are shown in Table II.21.31, below. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

<b>Table II.21.31</b>						
<b>Average Market Rate Rents by Number of Bedrooms</b>

<b>Total</b>	<b>21</b>

Table, II.21.38, on the following page, shows the most common answers from the 2016 calendar year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Uinta

County had a total of 11 respondents, with an average persons per household of 2.6 people. Of new residents to Uinta County, 90.9 percent were married and the most common age group arriving in the state was 55 to 64 years old. Most new residents moved to be closer to friends or relatives.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 63.6 percent of respondents owning thier residence. The average mortgage payment in Uinta County was \$825 and the average rent was \$900. When asked if they were satisfied with their current housing, 90.9 percent said they were satisfied with thier current housing.

<b>Table II.21.38</b> <b>Most Replied Response</b> Uinta County HNA Survey: Calendar Year 2016	
Question	Most Replied Answer (%)
<b>Demographics</b>	
Total Number of Respondents	11
Number of persons in household (Average)	2.6
Current age	55 to 64 years old (45.5%)
Marital status	Married (90.9%)
Primary reason for moving to Wyoming	Friends or relatives in Wyoming (27.3%)
In which industry are you primarily employed	Retired (36.4%)
Highest education level completed	Some College (45.5%)
Total household income from all sources	\$75,000 to \$99,999 dollars (33.3%)
<b>Current Housing Characteristics</b>	
Current Residence	Single family home (81.8%)
Do you own or rent	Own (63.6%)
How many bedrooms (Average)	2.8
How many full bathrooms (Average)	2.2
Average mortgage payment	\$825
Average rental payment	\$900
Are you satisfied with your current housing	Satisfied with current housing (90.9%)
<b>Housing Demand (If unsatisfied with current housing)</b>	
Reason you are unsatisfied	Housing unit is in poor condition (100.0%)
Are you seeking to change your housing situation	Seeking different housing (100.0%)
What type of unit are you seeking	Single family home (100.0%)
Type of tenure seeking	Seeking to buy (100.0%)

For residents who are unsatisfied with their current housing, 100.0 percent were unsatisfied because the housing unit is in poor condition. When asked what type of unit they were seeking, the most common response, 100.0 percent, indicated they were seeking a single family home. When asked if they preferred to own or rent, 100.0 percent wanted to buy and 0.0 wanted to rent their next residence. Additional survey data are presented in **Volume II. Technical Appendix.**<sup>172</sup>

<sup>172</sup> Percentages presented here may vary slightly from those in the technical appendix. This is because the percentages here are calculated with the missing responses excluded, where the percentages calculated in the technical appendix include all responses, even if they are missing.

### Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2015 5-year ACS data, 132 or 1.8 percent of households in Uinta County were overcrowded and another 74 or 1.0 percent of units were severely overcrowded, as shown in Table II.21.39, below. This housing problem was far more prevalent in renter households as compared to owner households.

<b>Table II.21.39</b>				
<b>Overcrowding and Severe Overcrowding</b>				
Uinta County				
2010-2015 5-Year ACS Data				
<b>Household</b>	<b>No Overcrowding</b>	<b>Overcrowding</b>	<b>Severe Overcrowding</b>	<b>Total</b>

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2015 5-year ACS, a total of 166 units or 1.9 percent of all housing units in Uinta County were lacking complete kitchen facilities. This compared to 2.6 percent of households statewide without complete kitchen facilities. These data are presented in Table II.21.40, at right.

<b>Table II.21.40</b> <b>Housing Units with Incomplete Kitchen Facilities</b> Uinta County 2010-2015 5-Year ACS Data		
Facilities	Uinta County	State of Wyoming
Complete Kitchen Facilities	8,599	259,728
Lacking Complete Kitchen Facilities	166	6,902
<b>Total Housing Units</b>	<b>8,765</b>	<b>266,630</b>
Percent Lacking	1.9%	2.6%

At the time of the 2015 ACS, a total of 317 units or 3.6 percent of all housing units in Uinta County were lacking complete plumbing facilities. This compared to 2.4 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.21.41, below.

<b>Table II.21.41</b> <b>Housing Units with Incomplete Plumbing Facilities</b> Uinta County 2010-2015 5-Year ACS Data		
Facilities	Uinta County	State of Wyoming
Complete Plumbing Facilities	8,448	260,327
Lacking Complete Plumbing Facilities	317	6,303
<b>Total Households</b>	<b>8,765</b>	<b>266,630</b>
Percent Lacking	3.6%	2.4%

The third type of housing problem reported in the 2014 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Uinta County, 15.4 percent of households had a cost burden and 8.7 percent of households had a severe cost burden, which compared to 14.3 percent with a cost burden and 9.5 percent with a severe cost burden in the State of Wyoming. Roughly 20.4 percent of homeowners with a mortgage in Uinta County experienced a cost burden and 8.9 percent experienced a severe cost burden, while 17.3 percent of renters had a cost burden and 15.4 percent had a severe cost burden, as seen in Table II.21.42, on the following page.

<b>Table II.21.42</b> <b>Cost Burden and Severe Cost Burden by Tenure</b> Uinta County 2010-2015 5-Year ACS Data

### 2017 Housing Needs Forecast

Three alternative housing forecasts were prepared: a *moderate growth* scenario, a *strong growth* scenario and a *very strong growth* scenario. While all three predictions are available in the *2016 Wyoming Housing Needs Forecast*, only the *strong growth* forecast is presented on the following page. The forecast of household formation by tenure was segmented by income as a percentage of Median Household Income (MHI). The income groupings for the counties were separated into five categories: 0 to 30 percent, 31 to 50 percent, 51 to 80 percent, 81 to 95 percent, and more than 95 percent of MHI.

The household forecast indicated a total increase of 698 households in Uinta County, from 7,668 in 2010 to 8,366 in 2040. Homeowners are expected to increase from 5,759 households in 2010 to 6,364 by 2040. Renters are anticipated to increase from 1,909 households in 2010 to 2,001 in 2040.

Homeownership from 2010 to 2040 is expected to increase by 57 households for homeowners with extremely low incomes or 30 percent or less of MHI. Homeownership for those with incomes from 30 to 50 percent of MHI is expected to increase by 50 households and by 87 for those with 51 to 80 percent of MHI.

Rental demand from the years 2010 to 2040 is expected to increase by 24 households for renters with extremely low incomes or 30 percent or less of MHI. Further, rental demand for those with 31 to 50 percent of MHI is expected to increase by 18 households over the period. Table II.21.43, below, provides details of the household forecast by tenure and income.
