

## UINTA COUNTY

### Demographics

The Census Bureau's current census estimates indicate that Uinta County's population decreased from 21,118 in 2010 to 21,066 in 2013, or by 0.2 percent. This compares to a statewide population growth of 3.4 percent over the period. The number of people from 25 to 44 years of age decreased by 2.3 percent, and the number of people from 55 to 64 years of age increased by 10.3 percent. The white population decreased by 1.2 percent, while the black population increased by 182.5 percent. The Hispanic population increased from 1,855 to 1,907 people between 2010 and 2013 or by 2.8 percent. These data are presented in Table II.21.1, below.

Table II.21.2, on the following page, presents the population of Uinta County by age and gender from the 2010 Census and 2013 current census estimates. The 2010 Census count showed a total of 10,662 males, who accounted for 50.5 percent of the population, and the remaining 49.5 percent, or 10,456 persons, were female. In 2013, the number of males rose to 10,680 persons, and accounted for 50.7 percent of the population, with the remaining 49.3 percent, or 10,386 persons being female.

At the time of the 2010 Census, there were 270 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters decreased by 24.6 percent, as shown in Table II.21.3, below.

<b>Table II.21.3</b> <b>Group Quarters Population</b> Uinta County 2000 SF1 and 2010 Census Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year

<sup>158</sup> In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the census tract level, and considered more robust than the one or three year sample estimates.

Table II.21.4, below, shows data on household type by tenure in the 2013 5-year ACS data. Household type is broken down by family households and non-family households. In 2013, there were an estimated 5,322 family households, of which 4,230 housed married couple families and 1,092 housed "other families." "Other family" is defined as either a male householder with no wife present, of whom there were 194 families, or a female householder with no husband present, of which there were 898 families. There were also an estimated 1,968 "non-family households," which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Uinta County was 73.0 percent, which compared to the statewide rate of 66.0 percent. Of the family households in Uinta County, 79.5 percent were married households, which compared to 80.3 percent in the State of Wyoming.

Family Type	Uinta County		State of Wyoming

Table II.21.5, on the following page, displays the 2013 5-year ACS census data for household type by household size. In 2013, there were 2,146 two-person family households, 1,116 three-person family households and 1,021 four-person family households. One-person non-family households made up 86.9 percent of all non-family households or an estimated 1,711 households. Uinta County's two persons households made up 32.9 percent of total housing units and four person households made up an additional 14.1 percent, which compares to 38.1 and 12.0 percent, respectively, for the State of Wyoming.

Table II.21.12, on the following page, presents the breakdown of households by unit type and tenure. Between 2009 and 2013, Uinta County saw an average of 4,232 owner-occupied single-family units compared to 583 single-family rental units. In Uinta County, single-family units comprised 66.0 percent of all households compared with 71.8 percent statewide. Uinta County had a total of 619 apartment rental units and total apartment units accounted for 8.8 percent of all

households. In the State of Wyoming, apartment units accounted for 8.1 percent of total households. There were also an estimated 1,561 mobile homes in Uinta County, which comprised 21.4 percent of all occupied housing units and compared to 13.4 statewide.

Table II.21.13, below, shows the number of households by year of construction. As shown, 8.3 percent, or 602 units, were built in 1939 or earlier in the county, and another 255 percent were built between 1940 and 1949. The number of households built between 2000 and 2004 was 707, which accounted for 9.7 percent of all households, and an additional 23 households, or .3 percent, were built in 2005 or later. These figures compare to 2,633 households, or 1.2 percent, that were built from 2005 or later statewide.

Table II.21.15, at right, shows the number of households in the county by number of bedrooms and tenure. There were 54 rental households with no bedrooms, otherwise known as studio apartments. Two-bedroom households accounted for 22.2 percent of total households in Uinta County, which compared to 24.2 percent statewide. In Uinta County, the 2,965 households with three bedrooms accounted for 40.7 percent of all households, and there were only 748 five-bedroom or more households, which accounted for 10.3 percent of all households.

The age of a structure influences its value. As shown in Table II.21.16, at right, structures built in 1939 or earlier had a median value of \$162,900, while structures built between 1950 and 1959 had a median value of \$172,500 and those built between 1990 to 1999 had a median value of \$166,200. The newest structures tended to have the highest values and those built between 2000 and 2004 and from 2005 or later had median values of \$287,000 and \$270,300, respectively. The total average median value in Uinta County was \$181,700, which compared to \$185,900 in the State of Wyoming.

<b>Table II.21.16</b> <b>Median Value by Year Structure Built</b> Uinta County 2009-2013 5-Year ACS Data

Household mortgage status is reported in Table II.21.17, below. In Uinta County, households with a mortgage accounted for 60.7 percent of all households or 3,217 housing units, and the remaining 39.3 percent or 2,080 units had no mortgage. Of those units with a mortgage, 447 had either a second mortgage or home equity loan, 31 had both a second mortgage and home equity loan, and 2,739 or 85.1 percent had no second mortgage or no home equity loan.

**Economics**

The HUD estimated MFI for Uinta County was \$75,800 in 2014.<sup>159</sup> This compares to Wyoming’s MFI of \$71,400. Diagram II.21.1, below, illustrates the estimated MFI for 2000 through 2013.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Uinta County’s labor force, defined as the number of persons working or actively seeking work, decreased by 195 persons, from 11,190 in 2012 to 10,995 in 2013. Employment decreased by 136 persons; unemployment decreased by 59 persons; and the unemployment rate, or the number of unemployed

<sup>159</sup> Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

persons as a percentage of the labor force, decreased from 5.1 percent in 2012 to 4.7 percent in 2013, as shown below in Diagram II.21.2.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. As shown in Table II.21.20, below, annual total monthly employment decreased by 3.03 percent between 2012 and 2013 from a total of 9,127 to 8,850 workers. Preliminary estimates shows employment increased to 8,986 persons in June 2014.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2013, the most recent year for which data are available, Uinta County recorded 12,455 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$982,509,000, and real per capita income was \$46,640 in 2013. This compares to a statewide average real per capita income of \$52,826. The average earnings per job in the county was \$48,003 in 2013, while Wyoming average earnings per job was \$52,420. These data are presented in full in **Volume II. Technical Appendix**.

### Housing

According to the Wyoming Cost of Living Index, average apartment rent in Uinta County decreased from \$603 in second quarter 2013 to \$602 in second quarter 2014, or by 0.2 percent. Detached single-family home rents decreased by 0.4 percent, rents for mobile homes on a lot increased by 15.6 percent, and rents for mobile home lots increased by 4.3 percent.

Uinta County rental prices experienced average annualized increases of 2.2 percent for apartments, 2.3 percent for houses, 2.1 percent for mobile homes plus a lot, and 1.4 percent for mobile home lots since fourth quarter 1986 through second quarter 2014. These figures compare to state average annualized increases in rental prices of 3.3 percent for apartments, 3.8 percent for houses, 3.5 percent for mobile homes plus a lot, and 3.1 percent for mobile home lots over the same period. Table II.21.23, at right, presents the Uinta County data for each rental type.<sup>160</sup>

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family unit authorizations in Uinta County increased from 34 authorized units in 2011 to 38 in 2012. Total units increased from 34 units in 2011 to 38 in 2012.

The real value of single-family building permits increased from \$199,100 in 2011 to \$218,700 in 2012. The value over the past decade, in real 2012 dollars, fluctuated from a high of \$218,700 in 2008 to a low of \$109,700 in 2002. These figures compare to the state average high of \$275,723 in 2000 and low of \$187,359 in 2003. Additional details of permit activity and per unit valuations are given in Table II.21.24, on the following page.

The average sales price of existing, detached, single-family homes was provided by the Department of Revenue (DOR). In 2013, the average sales price in Uinta County was \$209,631. This represented an increase of 9.7 percent from the previous year. In contrast, Wyoming’s weighted average was \$281,345, an increase of 5.6 percent over the previous year. A comparison of average sales prices between 2000 and 2013 is displayed in Table II.21.25, on the following page.

<b>Table II.21.25</b> <b>Average Sales Prices</b> Uinta County vs. Wyoming DOR Data, 2000–2013

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in the semiannual report ending in December 2014.<sup>161</sup> During December 2014, a total of 60 surveys were completed by property managers in Uinta County. Of the 1,317 rental units surveyed, 116 were vacant, for a vacancy rate of 8.8 percent, as shown in Table II.21.26, below. This rate compares to a 19.3 percent vacancy rate one year ago, and a statewide December 2014 vacancy rate of 4.6 percent.

<b>Table II.21.26</b> <b>Total Units, Vacant Units, and Vacancy Rate</b> Uinta County RVS Data, June 2001–December 2014				
Year	Sample	Total Units	Vacant Units	Vacancy Rate
2001a	17	849	34	4.0%

2014b	60	1,317	116	8.8%

<sup>161</sup>Those signified as a in the “year” column of Table II.21.10 are conducted in June/July of each year. Those signified as b are conducted each November/December.

Diagram II.21.3, below, shows the historical vacancy rate for Uinta County and Wyoming. As can be seen, the vacancy rate in Uinta County was above the statewide rate, except for the period between 2005 and 2008, when the vacancy rate hovered around zero.

Diagram II.21.4, below, shows the average rent of single-family and apartment units in Uinta County. In 2014, average rents for single-family units decreased to \$797 and average rents for apartments rose slightly to \$674.

Table II.21.27 below shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 64 single family units in Uinta County, with 1 of them available. This translates into a vacancy rate of 1.6 percent in Uinta County, which compares to a single family vacancy rate of 3.0 percent for the State of Wyoming. There were 793 apartment units reported in the survey, with 70 of them available, which resulted in a vacancy rate of 8.8 percent. This compares to a statewide vacancy rate of 3.9 percent for apartment units across the state.

Average market-rate rents by unit type are shown in Table II.21.29, on the following page. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

<b>Table II.21.29</b>

Table, II.21.38, below, shows the most common answers from the 2014 calendar year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Uinta County had a total of 25 respondents, with an average persons per household of 3.2 people. Of new residents to Uinta County, 64.0 percent were married and the most common age group arriving in the state was 25 to 34 years old. Most new residents moved for a job transfer.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 48.0 percent of respondents renting their residence. The average mortgage payment in Uinta County was \$696 and the average rent was \$550. When asked if they were satisfied with their current housing, 76.0 percent said they were satisfied with thier current housing.

<b>Table II.21.38</b> <b>Most Replied Response</b> Uinta County HNA Survey: Calendar Year 2014	
Question	Most Replied Answer (%)
<b>Demographics</b>	
Total Number of Respondents	25
Number of persons in household (Average)	3.2
Current age	25 to 34 years old (45.8%)
Marital status	Married (64.0%)
Primary reason for moving to Wyoming	Job transfer (24.0%)
In which industry are you primarily employed	Other (32.0%)
Highest education level completed	High School Diploma/GED (40.0%)
Total household income from all sources	\$75,000 to \$99,999 dollars (31.3%)
<b>Current Housing Characteristics</b>	
Current Residence	Single family home (64.0%)
Do you own or rent	Rent (48.0%)
How many bedrooms (Average)	2.8
How many full bathrooms (Average)	1.7
Average mortgage payment	\$696
Average rental payment	\$550
Are you satisfied with your current housing	Satisfied with current housing (76.0%)
<b>Housing Demand (If unsatisfied with current housing)</b>	
Reason you are unsatisfied	Other (66.7%)
Are you seeking to change your housing situation	Seeking different housing (83.3%)
What type of unit are you seeking	Single family home (80.0%)
Type of tenure seeking	Seeking to buy (60.0%)
If own, do you plan on building or buying	Buy an existing unit (66.7%)
Expected buying price	\$250,000 to \$299,999 dollars (100.0%)
Expected building price	\$200,000 to \$249,999 dollars (50.0%)
Expected rental price	\$501 to \$600 dollars (50.0%)

For residents who are unsatisfied with their current housing, 66.7 percent were unsatisfied because of some other reason not listed in the survey. When asked what type of unit they were seeking, the most common response, 80.0 percent, indicated they were seeking a single family home. When asked if they preferred to own or rent, 60.0 percent wanted to buy and 40.0 wanted to rent their next residence. Most residents wishing to buy a house anticipated spending \$250,000 to \$299,999 dollars if they were buying an existing unit, and \$200,000 to \$249,999 dollars if anticipated building a new unit. Of those respondents who wished to rent, the most common response, 50.0

percent of respondents, anticipated spending \$501 to \$600 dollars. Additional survey data are presented in **Volume II. Technical Appendix**<sup>162</sup>.

### Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2013 5-year ACS data, 113 or 1.6 percent of households in Uinta County were overcrowded and another 50 or .7 percent of units were severely overcrowded, as shown in Table II.21.39, below. This housing problem was far more prevalent in renter households as compared to owner households.

<b>Table II.21.39</b>				
<b>Overcrowding and Severe Overcrowding</b>				
Uinta County				
2009-2013 5-Year ACS Data				
<b>Household</b>	<b>No Overcrowding</b>	<b>Overcrowding</b>	<b>Severe Overcrowding</b>	<b>Total</b>

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

<sup>162</sup> Percentages presented here may vary slightly from those in the technical appendix. This is because the percentages here are calculated with the missing responses excluded, where the percentages calculated in the technical appendix include all responses, even if they are missing.

At the time of the 2013 5-year ACS, a total of 127 units or 1.5 percent of all housing units in Uinta County were lacking complete kitchen facilities. This compared to 2.6 percent of households statewide without complete kitchen facilities. These data are presented in Table II.21.40, at right.

<b>Table II.21.40</b> <b>Housing Units with Incomplete Kitchen Facilities</b> Uinta County 2009-2013 5-Year ACS Data		
Facilities	Uinta County	State of Wyoming
Complete Kitchen Facilities	8,586	256,276
Lacking Complete Kitchen Facilities	127	6,764
<b>Total Housing Units</b>	<b>8,713</b>	<b>263,040</b>
Percent Lacking	1.5%	2.6%

At the time of the 2013 ACS, a total of 230 units or 2.6 percent of all housing units in Uinta County were lacking complete plumbing facilities. This compared to 2.0 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.21.41, below.

<b>Table II.21.41</b> <b>Housing Units with Incomplete Plumbing Facilities</b> Uinta County 2009-2013 5-Year ACS Data		
Facilities	Uinta County	State of Wyoming
Complete Plumbing Facilities	8,483	257,728
Lacking Complete Plumbing Facilities	230	5,312
<b>Total Households</b>	<b>8,713</b>	<b>263,040</b>
Percent Lacking	2.6%	2.0%

The third type of housing problem reported in the 2013 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Uinta County, 12.9 percent of households had a cost burden and 9.4 percent of households had a severe cost burden, which compared to 14.3 percent with a cost burden and 9.9 percent with a severe cost burden in the State of Wyoming. Roughly 15.6 percent of homeowners with a mortgage in Uinta County experienced a cost burden and 5.9 percent experienced a severe cost burden, while 15.5 percent of renters had a cost burden and 19.5 percent had a severe cost burden, as seen in Table II.21.42, on the following page.

### 2015 Housing Needs Forecast

Three alternative housing forecasts were prepared: a *moderate growth* scenario, a *strong growth* scenario and a *very strong growth* scenario. While all three predictions are available in the *2015 Wyoming Housing Needs Forecast*, only the *strong growth* forecast is presented on the following page. The forecast of household formation by tenure was segmented by income as a percentage of Median Household Income (MHI). The income groupings for the counties were separated into five categories: 0 to 30 percent, 31 to 50 percent, 51 to 80 percent, 81 to 95 percent, and more than 95 percent of MHI.

The household forecast indicated a total increase of 3,882 households in Uinta County, from 7,668 in 2010 to 11,550 in 2040. Homeowners are expected to increase from 5,759 households in 2010 to 8,615 by 2040. Renters are anticipated to increase from 1,909 households in 2010 to 2,935 in 2040.

Homeownership from 2010 to 2040 is expected to increase by 238 households for homeowners with extremely low incomes or 30 percent or less of MHI. Homeownership for those with incomes from 30 to 50 percent of MHI is expected to increase by 202 households and by 423 for those with 51 to 80 percent of MHI.

Rental demand from the years 2010 to 2040 is expected to increase by 333 households for renters with extremely low incomes or 30 percent or less of MHI. Further, rental demand for those with 31 to 50 percent of MHI is expected to increase by 204 households over the period. Table II.1.43, below, provides details of the household forecast by tenure and income.

<b>Table II.21.43</b>						
<b>Household Forecast by Tenure and Income</b>						
Uinta County						
Strong Growth Scenario						
<b>Year</b>	<b>0-30%</b>	<b>31-50%</b>	<b>51-80%</b>	<b>81-95%</b>	<b>96+%</b>	<b>Total</b>
<b>Homeowners by Percent of Median Household Income</b>						
2010	481	408	853	387	3,630	5,759
2015	501	426	889	404	3,786	6,006
2020	536	455	950	432	4,045	6,418
2025	573	487	1,017	462	4,329	6,868
2030	620	527	1,100	500	4,684	7,430
2035	669	568	1,186	539	5,050	8,011
2040	719	611	1,275	580	5,431	8,615
<b>Renters by Percent of Median Household Income</b>						
2010	619	379	368	106	436	1,909
2015	644	394	383	111	453	1,985
2020	688	421	409	118	484	2,121
