

WASHAKIE COUNTY

Demographics

The Census Bureau’s current census estimates indicate that Washakie County’s population decreased from 8,533 in 2010 to 8,328 in 2015, or by 2.4 percent. This compares to a statewide population growth of 4.0 percent over the period. The number of people from 25 to 44 years of age decreased by 3.2 percent, and the number of people from 55 to 64 years of age decreased by 1.6 percent. The white population decreased by 3.5 percent, while the black population increased by 154.2 percent. The Hispanic population increased from 1,162 to 1,194 people between 2010 and 2015 or by 2.8 percent. These data are presented in Table II.22.1, below.

At the time of the 2010 Census, there were 140 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters decreased by 29.3 percent, as shown in Table II.22.3, below.

Table II.22.3 Group Quarters Population Washakie County 2000 SF1 and 2010 Census Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year

¹⁷³ In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Table II.22.4, below, shows data on household type by tenure in the 2015 5-year ACS data. Household type is broken down by family households and non-family households. In 2014, there were an estimated 2,233 family households, of which 1,816 housed married couple families and 417 housed “other families.” “Other family” is defined as either a male householder with no wife present, of whom there were 154 families, or a female householder with no husband present, of which there were 263 families. There were also an estimated 1,279 “non-family households,” which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Washakie County was 63.6 percent, which compared to the statewide rate of 64.9 percent. Of the family households in Washakie County, 81.3 percent were married households, which compared to 79.7 percent in the State of Wyoming.

The age of a structure influences its value. As shown in Table II.22.16, at right, structures built in 1939 or earlier had a median value of \$97,200, while structures built between 1950 and 1959 had a median value of \$130,600 and those built between 1990 to 1999 had a median value of \$263,400. The newest structures tended to have the highest values and those built between 2000 and 2009 had a median value of \$281,600. The total average median value in Washakie County was \$160,800, which compared to \$194,800 in the State of Wyoming.

Table II.22.16 Median Value by Year Structure Built Washakie County 2010-2015 5-Year ACS Data		
Year Built	Washakie County	State of Wyoming

Economics

The HUD estimated MFI for Washakie County was \$66,300 in 2016.¹⁷⁴ This compares to Wyoming’s MFI of \$73,300. Diagram II.22.1, below, illustrates the estimated MFI for 2000 through 2016.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Washakie County’s labor force, defined as the number of persons working or actively seeking work,

¹⁷⁴ Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

increased by 37 persons, from 4,285 in 2014 to 4,322 in 2015. Employment increased by 49 persons; unemployment decreased by 12 persons; and the unemployment rate, or the number of unemployed persons as a percentage of the labor force, decreased from 4.3 percent in 2014 to 4.0 percent in 2015, as shown below in Diagram II.22.2.

The BLS produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Data from this series are from the period of January 2005 through June 2016 and are presented in Table II.22.20, below, with the 2016 information considered preliminary (p). As shown therein, total annual employment stood at 3,799 persons in 2015; this figure was higher than the 2014 average by 17 jobs. In June total preliminary monthly employment was estimated to be 3,789 jobs.

The QCEW also reports average weekly wages, which represents total compensation paid during the calendar quarter, regardless of when services were performed. The BLS QCEW data indicated average weekly wages were \$772 in 2014. In 2015, average weekly wages saw an increase of 0.26 over the prior year, rising to \$774. The most recent preliminary estimates show average weekly wages were 800 in the second quarter on 2016. These data are shown in Table II.22.21, below.

Table II.22.21 Average Weekly Wages Washakie County BLS QCEW Data, 2001–2016(p)						
Year	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Annual	% Change

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2015, the most recent year for which data are available, Washakie County recorded 5,416 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$361,937,000, and real per capita income was \$43,460 in 2015. This compares to a statewide average real per capita income of \$56,081. The average earnings per job in the county was \$45,402 in 2015, while Wyoming average earnings per job was \$53,875. These data are presented in full in **Volume II. Technical Appendix.**

Housing

According to the Wyoming cost of living index, real average apartment rent in Washakie County increased from \$489 in second quarter 2015 to \$493 in second quarter 2016, or by 0.7 percent. Over the same period detached single-family home rents decreased by 0.4 percent.

Washakie County rental prices experienced average annualized increases of 0.0 percent for apartments and an increase of 0.8 percent for houses since fourth quarter 1986 through second quarter 2016. These figures compare to state average annualized increases in rental prices of 0.9 percent for apartments, 1.3 percent for houses, 1.1 percent for mobile homes plus a lot, and 0.9 percent for mobile home lots over the same period. Table II.22.23, at right, presents the Washakie County data for each rental type.¹⁷⁵

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually.

¹⁷⁵ Apartments are two-bedroom units, excluding gas and electricity. Mobile home lots are single-wide units and include water costs. Houses are for two- or three-bedroom dwelling units, excluding gas and electricity. A mobile home on a lot includes a combined rent for mobile home and lot.

Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Washakie County increased from 4 authorizations in 2014 to 5 in 2015.

The real value of single-family building permits increased from \$193,910 in 2014 to \$194,000 in 2015. This compares to an increase in permit value statewide, with values rising from \$298,797 in 2014 to \$348,576 in 2015. Additional details are given in Table II.22.24, below.

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in the semiannual report ending in December 2016.¹⁷⁶ During December, a total of 28 surveys were completed in Washakie County. Of the 335 rental units surveyed, 54 were vacant, indicating a vacancy rate of 16.1 percent, as shown in Table II.22.26, at right. This rate compares to a 13.6 percent vacancy rate one year ago and a statewide December 2016 vacancy rate of 11.1 percent.

Diagram II.22.3, on the following page, shows the historical vacancy rate for Washakie County and Wyoming. As can be seen, the vacancy rate in Washakie County was above the statewide rate early in the decade, but except for a single spike in 2012, has remained below the statewide rate since 2007. In 2014, the vacancy rate rose to just above the statewide rate and remained above it during the most recent surveys.

Table II.22.26 Total Units, Vacant Units, and Vacancy Rate Washakie County RVS Data, June 2001– December 2016				
Year	Sample	Total Units	Vacant Units	Vacancy Rate

¹⁷⁶Those signified as a in the “year” column of Table II.22.10 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

Diagram II.22.4, below, shows the average rent of single-family and apartment units in Washakie County. In 2016, average rents for single-family units jumped to \$751, and average rents for apartments increased to \$517.

Table II.22.27 below shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 77 single family units in Washakie County, with 15 of them available. This translates into a vacancy rate of 19.5 percent in Washakie County, which compares to a single family vacancy rate of 6.6 percent for the State of Wyoming. There were 185 apartment units reported in the survey, with 28 of them available, which resulted in a vacancy rate of 15.1 percent. This compares to a statewide vacancy rate of 9.8 percent for apartment units across the state.

Table II.22.27			
Rental Vacancy Survey by Type			
Washakie County			
RVS Data, December 2016			
Place	Total Units	Vacant Units	Vacancy Rate

Average market-rate rents by unit type are shown in Table II.22.31, below. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

Table II.22.31 Average Market Rate Rents by Number of Bedrooms Washakie County RVS Data, December 2016						
Number of Bedrooms	Single Family Units	Duplex Units	Apartment Units	Mobile Homes	“Other” Units	Total

Total	77	15	19.5%

The availability of apartment units by average rent is displayed in Table II.22.33 below. The lowest vacancy rate was seen in apartment units renting for less than 500 dollars, with a vacancy rate of 8.3 percent.

Table II.22.33 Apartment Market Rate Rents by Vacancy Status Washakie County RVS Data, December 2016			
Average Rents	Apartment Units	Available Apartment Units	Vacancy Rate
Less Than \$500	96	8	8.3%
\$500 to \$1,000	66	19	28.8%
\$1,000 to \$1,500			%
Above \$1,500			%
Missing	23	1	4.3%
Total	185	28	15.1%

Table II.22.34, below, shows the condition of rental units by unit type for Washakie County. Respondents could rate their units from poor to excellent, however many respondents did not know, or did not wish to comment on the condition of their units. As reported below, most single family units were in good condition, with most apartments being in good condition. Details by unit type and condition are displayed below.

Table II.22.34 Condition by Unit Type Washakie County RVS Data, December 2016							
Conditions	Single Family Units	Duplex Units	Apartment Units	Mobile Homes	“Other” Units	Don’t Know	Total
Poor						.	
Fair	0	0	17	0	9	.	26
Average	20	0	19	4	0	.	43

Table, II.22.38, below, shows the most common answers from the 2016 calendar year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Washakie County had a total of 5 respondents, with an average persons per household of 2.6 people. Of new residents to Washakie County, 40.0 percent were married and the most common age group arriving in the state was 25 to 34 years old. Most new residents moved for a new job.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 80.0 percent of respondents renting their residence. The average mortgage payment in Washakie County was \$700 and the average rent was \$844. When asked if they were satisfied with their current housing, 80.0 percent said they were satisfied with thier current housing.

Table II.22.38 Most Replied Response Washakie County HNA Survey: Calendar Year 2016	
Question	Most Replied Answer (%)
Demographics	
Total Number of Respondents	5
Number of persons in household (Average)	2.6
Current age	25 to 34 years old (40.0%)
Marital status	Married (40.0%)
Primary reason for moving to Wyoming	New job (60.0%)
In which industry are you primarily employed	Other (40.0%)
Highest education level completed	College Graduate (60.0%)
Total household income from all sources	\$10,000 to \$19,999 dollars (33.3%)
Current Housing Characteristics	
Current Residence	Single family home (100.0%)
Do you own or rent	Rent (80.0%)
How many bedrooms (Average)	2.4
How many full bathrooms (Average)	1.0
Average mortgage payment	\$700
Average rental payment	\$844
Are you satisfied with your current housing	Satisfied with current housing (80.0%)
Housing Demand (If unsatisfied with current housing)	
Reason you are unsatisfied	Rent or mortgage is too high (100.0%)
Are you seeking to change your housing situation	Seeking different housing (100.0%)
What type of unit are you seeking	Single family home (100.0%)
Type of tenure seeking	Seeking to rent (100.0%)

For residents who are unsatisfied with their current housing, 100.0 percent were unsatisfied because the rent or mortgage is too high. When asked what type of unit they were seeking, the most common response, 100.0 percent, indicated they were seeking a single family home. When asked if they preferred to own or rent, 0.0 percent wanted to buy and 100.0 wanted to rent their next residence. Additional survey data are presented in **Volume II. Technical Appendix.**¹⁷⁷

¹⁷⁷ Percentages presented here may vary slightly from those in the technical appendix. This is because the percentages here are calculated with the missing responses excluded, where the percentages calculated in the technical appendix include all responses, even if they are missing.

Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2015 5-year ACS data, 63 or 1.8 percent of households in Washakie County were overcrowded and another 21 or .6 percent of units were severely overcrowded, as shown in Table II.22.39, below. This housing problem was far more prevalent in renter households as compared to owner households.

Table II.22.39				
Overcrowding and Severe Overcrowding				
Washakie County

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2015 5-year ACS, a total of 72 units or 1.9 percent of all housing units in Washakie County were lacking complete kitchen facilities. This compared to 2.6 percent of households statewide without complete kitchen facilities. These data are presented in Table II.22.40, at right.

Table II.22.40 Housing Units with Incomplete Kitchen Facilities Washakie County 2010-2015 5-Year ACS Data		
Facilities	Washakie County	State of Wyoming
Complete Kitchen Facilities	3,747	259,728
Lacking Complete Kitchen Facilities	72	6,902
Total Housing Units	3,819	266,630
Percent Lacking	1.9%	2.6%

At the time of the 2015 ACS, a total of 42 units or 1.1 percent of all housing units in Washakie County were lacking complete plumbing facilities. This compared to 2.4 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.22.41, below.

Table II.22.41 Housing Units with Incomplete Plumbing Facilities Washakie County 2010-2015 5-Year ACS Data		
Facilities	Washakie County	State of Wyoming
Complete Plumbing Facilities	3,777	260,327
Lacking Complete Plumbing Facilities	42	6,303
Total Households	3,819	266,630
Percent Lacking	1.1%	2.4%

The third type of housing problem reported in the 2014 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Washakie County, 13.4 percent of households had a cost burden and 8.3 percent of households had a severe cost burden, which compared to 14.3 percent with a cost burden and 9.5 percent with a severe cost burden in the State of Wyoming. Roughly 15.2 percent of homeowners with a mortgage in Washakie County experienced a cost burden and 11.0 percent experienced a severe cost burden, while 21.4 percent of renters had a cost burden and 9.8 percent had a severe cost burden, as seen in Table II.22.42, on the following page.

2017 Housing Needs Forecast

Three alternative housing forecasts were prepared: a *moderate growth* scenario, a *strong growth* scenario and a *very strong growth* scenario. While all three predictions are available in the *2016 Wyoming Housing Needs Forecast*, only the *strong growth* forecast is presented on the following page. The forecast of household formation by tenure was segmented by income as a percentage of Median Household Income (MHI). The income groupings for the counties were separated into five categories: 0 to 30 percent, 31 to 50 percent, 51 to 80 percent, 81 to 95 percent, and more than 95 percent of MHI.

The household forecast indicated a total increase of 100 households in Washakie County, from 3,492 in 2010 to 3,592 in 2040. Homeowners are expected to increase from 2,560 households in 2010 to 2,647 by 2040. Renters are anticipated to increase from 932 households in 2010 to 945 in 2040.

Homeownership from 2010 to 2040 is expected to increase by 6 households for homeowners with extremely low incomes or 30 percent or less of MHI. Homeownership for those with incomes from 30 to 50 percent of MHI is expected to increase by 8 households and by 14 for those with 51 to 80 percent of MHI.

Rental demand from the years 2010 to 2040 is expected to increase by 3 households for renters with extremely low incomes or 30 percent or less of MHI. Further, rental demand for those with 31 to 50 percent of MHI is expected to increase by 2 households over the period. Table II.22.43, below, provides details of the household forecast by tenure and income.
