

WASHAKIE COUNTY

Demographics

The Census Bureau's current census estimates indicate that Washakie County's population decreased from 8,533 in 2010 to 8,463 in 2013, or by 0.8 percent. This compares to a statewide population growth of 3.4 percent over the period. The number of people from 25 to 44 years of age decreased by 2.7 percent, and the number of people from 55 to 64 years of age increased by 2.9 percent. The white population decreased by 1.7 percent, while the black population increased by 183.3 percent. The Hispanic population increased from 1,162 to 1,198 people between 2010 and 2013 or by 3.1 percent. These data are presented in Table II.22.1, below.

At the time of the 2010 Census, there were 140 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters decreased by 29.3 percent, as shown in Table II.22.3, below.

Table II.22.3 Group Quarters Population Washakie County 2000 SF1 and 2010 Census Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year

¹⁶³ In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the census tract level, and considered more robust than the one or three year sample estimates.

Table II.22.4, below, shows data on household type by tenure in the 2013 5-year ACS data. Household type is broken down by family households and non-family households. In 2013, there were an estimated 2,197 family households, of which 1,841 housed married couple families and 356 housed “other families.” “Other family” is defined as either a male householder with no wife present, of whom there were 109 families, or a female householder with no husband present, of which there were 247 families. There were also an estimated 1,271 “non-family households,” which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Washakie County was 63.4 percent, which compared to the statewide rate of 66.0 percent. Of the family households in Washakie County, 83.8 percent were married households, which compared to 80.3 percent in the State of Wyoming.

The age of a structure influences its value. As shown in Table II.22.16, at right, structures built in 1939 or earlier had a median value of \$85,400, while structures built between 1950 and 1959 had a median value of \$112,300 and those built between 1990 to 1999 had a median value of \$225,800. The newest structures tended to have the highest values and those built between 2000 and 2004 and from 2005 or later had median values of \$320,900 and \$, respectively. The total average median value in Washakie County was \$162,600, which compared to \$185,900 in the State of Wyoming.

Table II.22.16 Median Value by Year Structure Built Washakie County 2009-2013 5-Year ACS Data		
Year Built	Washakie County	State of Wyoming
1939 or earlier	85,400	154,300
1940 to 1949	101,600	136,700
1950 to 1959	112,300	156,800

Economics

The HUD estimated MFI for Washakie County was \$67,700 in 2014.¹⁶⁴ This compares to Wyoming’s MFI of \$71,400. Diagram II.22.1, below, illustrates the estimated MFI for 2000 through 2014.

Labor force and employment statistics were derived from Bureau of Labor Statistics (BLS) data. Washakie County’s labor force, defined as the number of persons working or actively seeking work, decreased by 78 persons, from 4,383 in 2012 to 4,305 in 2013. Employment decreased by 56 persons; unemployment decreased by 22 persons; and the unemployment rate, or the number of

¹⁶⁴ Starting from the year 2003, HUD MFI estimates were re-benchmarked using 2000 Census income limits, hence the unusual increase in estimates compared to earlier years.

unemployed persons as a percentage of the labor force, decreased from 5.4 percent in 2012 to 5.0 percent in 2013, as shown below in Diagram II.22.2.

The BLS, in conjunction with the State Employment Security Agencies (SESAs), produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent the number of workers who worked during or received pay for the pay period. Members of the armed forces, the self-employed, proprietors, domestic workers, and unpaid family workers are not included in QCEW estimates. As shown in Table II.22.20, below, annual total monthly employment decreased by 2.41 percent between 2012 and 2013, from a total of 3,904 to 3,810 workers. Preliminary estimates shows employment increased to 3,878 persons in June 2014.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2013, the most recent year for which data are available, Washakie County recorded 5,501 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$380,180,000, and real per capita income was \$44,923 in 2013. This compares to a statewide average real per capita income of \$52,826. The average earnings per job in the county was \$44,392 in 2013, while Wyoming average earnings per job was \$52,420. These data are presented in full in **Volume II. Technical Appendix**.

Housing

According to the Wyoming cost of living index, average apartment rent in Washakie County decreased from \$476 in second quarter 2013 to \$474 in second quarter 2014, or by 0.4 percent. Over the same period detached single-family home rents increased by 5.4 percent.

Washakie County rental prices experienced average annualized increases of 2.2 percent for apartments and 3.0 percent for houses since fourth quarter 1986 through second quarter 2014. These figures compare to state average annualized increases in rental prices of 3.3 percent for apartments, 3.8 percent for houses, 3.5 percent for mobile homes plus a lot, and 3.1 percent for mobile home lots over the same period. Table II.22.23, at right, presents the Washakie County data for each rental type.¹⁶⁵

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Washakie County increased from one authorized unit in 2012 to four in 2013.

The real value of single-family building permits increased from \$40,597 in 2012 to \$161,000 in 2013. The value over the past decade, in real 2013 dollars, fluctuated from a high of \$238,029 in 2012 to a low of \$40,597 in 2012. These figures compare to the state average high of \$289,650 in 2013 and a low of \$187,810 in 2003. Additional details of permit activity and per unit valuations are given in Table II.22.24, on the following page.

The average sales price of existing, detached, single-family homes was provided by the Department of Revenue (DOR). In 2013, the average sales price in Washakie County was \$127,447. This represented a decrease of 13.0 percent from the previous year. In contrast, Wyoming’s average was \$281,345, an increase of 5.6 percent over the previous year. A comparison of average sales prices between 1999 and 2013 is displayed in Table II.22.25, on the following page.

Table II.22.25 Average Sales Prices Washakie County vs. Wyoming DOR Data, 2000–2013

2013	127,447	-13.0	281,345	5.6

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in the semiannual report ending in December 2014.¹⁶⁶ During December, a total of 22 surveys were completed in Washakie County. Of the 322 rental units surveyed, 15 were vacant, indicating a vacancy rate of 4.7 percent, as shown in Table II.22.26, below. This rate compares to a 5.7 percent vacancy rate one year ago and a statewide December 2014 vacancy rate of 4.6 percent.

Table II.22.26 Total Units, Vacant Units, and Vacancy Rate Washakie County RVS Data, June 2001–December 2014

¹⁶⁶Those signified as a in the “year” column of Table II.22.10 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

Diagram II.22.3, below, shows the historical vacancy rate for Washakie County and Wyoming. As can be seen, the vacancy rate in Washakie County was above the statewide rate early in the decade, but except for a single spike in 2012, has remained below the statewide rate since 2007. In 2014, the vacancy rate rose to just above the Statewide rate and remained above it the most recent survey.

Diagram II.22.4, below, shows the average rent of single-family and apartment units in Washakie County. In 2014, average rents for single-family units decreased to \$661, and average rents for apartments decreased to \$481.

Table II.22.27 below shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 53 single family units in Washakie County, with 4 of them available. This translates into a vacancy rate of 7.5 percent in Washakie County, which compares to a single family vacancy rate of 3.0 percent for the State of Wyoming. There were 232 apartment units reported in the survey, with 6 of them available, which resulted in a vacancy rate of 2.6 percent. This compares to a statewide vacancy rate of 3.9 percent for apartment units across the state.

Average market-rate rents by unit type are shown in Table II.22.29, on the following page. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

Table II.22.33, below, shows the condition of rental units by unit type for Washakie County. Respondents could rate their units from poor to excellent, however many respondents did not know, or did not wish to comment on the condition of their units. As reported below, most single family units were in good condition, with most apartments being in good condition. Details by unit type and condition are displayed below.

Table II.22.33 Condition by Unit Type Washakie County RVS Data, December 2014

Table, II.22.38, below shows the most common answers from the 2014 calendar year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Washakie County had a total of 19 respondents, with an average persons per household of 2.8 people. Of new residents to Washakie County, 68.4 percent were married and the most common age group arriving in the state was 25 to 34 years old. Most new residents moved for a new job.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 47.4 percent of respondents renting their residence. The average mortgage payment in Washakie County was \$789 and the average rent was \$371. When asked if they were satisfied with their current housing, 94.7 percent said they were satisfied with thier current housing.

Table II.22.38 Most Replied Response Washakie County HNA Survey: Calendar Year 2014	
Question	Most Replied Answer (%)
Demographics	
Total Number of Respondents	19
Number of persons in household (Average)	2.8
Current age	25 to 34 years old (44.4%)
Marital status	Married (68.4%)
Primary reason for moving to Wyoming	New job (26.3%)
In which industry are you primarily employed	Other (15.8%)
Highest education level completed	College Graduate (42.1%)
Total household income from all sources	\$30,000 to \$39,999 dollars (25.0%)
Current Housing Characteristics	
Current Residence	Single family home (94.7%)
Do you own or rent	Rent (47.4%)
How many bedrooms (Average)	3.1
How many full bathrooms (Average)	1.7
Average mortgage payment	\$789
Average rental payment	\$371
Are you satisfied with your current housing	Satisfied with current housing (94.7%)
Housing Demand (If unsatisfied with current housing)	
Reason you are unsatisfied	Rent or mortgage is too high (100.0%)
Are you seeking to change your housing situation	Not seeking different housing (66.7%)
What type of unit are you seeking	Other (.0%)
Type of tenure seeking	Don't know (100.0%)
If own, do you plan on building or buying	Don't know (100.0%)
Expected buying price	.
Expected building price	.
Expected rental price	.

For residents who are unsatisfied with their current housing, 100.0 percent were unsatisfied because the rent or mortgage is too high. Additional survey data are presented in **Volume II. Technical Appendix.**

¹⁶⁷

¹⁶⁷ Percentages presented here may vary slightly from those in the technical appendix. This is because the percentages here are calculated with the missing responses excluded, where the percentages calculated in the technical appendix include all responses, even if they are missing.

Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2013 5-year ACS data, 60 or 1.7 percent of households in Washakie County were overcrowded and another 14 or .4 percent of units were severely overcrowded, as shown in Table II.22.39, below. This housing problem was far more prevalent in renter households as compared to owner households.

Table II.22.39				
Overcrowding and Severe Overcrowding				
Washakie County

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2013 5-year ACS, a total of 52 units or 1.4 percent of all housing units in Washakie County were lacking complete kitchen facilities. This compared to 2.6 percent of households statewide without complete kitchen facilities. These data are presented in Table II.22.40, at right.

Table II.22.40 Housing Units with Incomplete Kitchen Facilities Washakie County 2009-2013 5-Year ACS Data		
Facilities	Washakie County	State of Wyoming
Complete Kitchen Facilities	3,768	256,276
Lacking Complete Kitchen Facilities	52	6,764
Total Housing Units	3,820	263,040
Percent Lacking	1.4%	2.6%

At the time of the 2013 ACS, a total of 11 units or .3 percent of all housing units in Washakie County were lacking complete plumbing facilities. This compared to 2.0 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.22.41, below.

Table II.22.41 Housing Units with Incomplete Plumbing Facilities Washakie County 2009-2013 5-Year ACS Data		
Facilities	Washakie County	State of Wyoming
Complete Plumbing Facilities	3,809	257,728
Lacking Complete Plumbing Facilities	11	5,312
Total Households	3,820	263,040
Percent Lacking	.3%	2.0%

The third type of housing problem reported in the 2013 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Washakie County, 14.9 percent of households had a cost burden and 9.0 percent of households had a severe cost burden, which compared to 14.3 percent with a cost burden and 9.9 percent with a severe cost burden in the State of Wyoming. Roughly 20.5 percent of homeowners with a mortgage in Washakie County experienced a cost burden and 13.3 percent experienced a severe cost burden, while 14.5 percent of renters had a cost burden and 6.7 percent had a severe cost burden, as seen in Table II.22.42, on the following page.

2015 Housing Needs Forecast

Three alternative housing forecasts were prepared: a *moderate growth* scenario, a *strong growth* scenario and a *very strong growth* scenario. While all three predictions are available in the *2015 Wyoming Housing Needs Forecast*, only the *strong growth* forecast is presented on the following page. The forecast of household formation by tenure was segmented by income as a percentage of Median Household Income (MHI). The income groupings for the counties were separated into five categories: 0 to 30 percent, 31 to 50 percent, 51 to 80 percent, 81 to 95 percent, and more than 95 percent of MHI.

The household forecast indicated a total increase of 470 households in Washakie County, from 3,492 in 2010 to 3,962 in 2040. Homeowners are expected to increase from 2,560 households in 2010 to 2,933 by 2040. Renters are anticipated to increase from 932 households in 2010 to 1,029 in 2040.

Homeownership from 2010 to 2040 is expected to increase by 32 households for homeowners with extremely low incomes or 30 percent or less of MHI. Homeownership for those with incomes from 30 to 50 percent of MHI is expected to increase by 34 households and by 63 for those with 51 to 80 percent of MHI.

Rental demand from the years 2010 to 2040 is expected to increase by 21 households for renters with extremely low incomes or 30 percent or less of MHI. Further, rental demand for those with 31 to 50 percent of MHI is expected to increase by 11 households over the period. Table II.1.43, below, provides details of the household forecast by tenure and income.
