

## LARAMIE COUNTY

### Demographics

The Census Bureau’s current census estimates indicate that Laramie County’s population increased from 91,738 in 2010 to 98,136 in 2016, or by 7.0 percent. This compares to a statewide population change of 3.9 percent over the period. The number of people from 25 to 35 years of age increased by 16.6 percent, and the number of people from 55 to 64 years of age increased by 10.4 percent. The white population increased by 6.0 percent, while the black population increased by 20.8 percent. The Hispanic population increased from 11,978 to 14,356 people between 2010 and 2016 or by 19.9 percent. These data are presented in Table II.11.1.

At the time of the 2010 Census, there were 1,644 persons living in “group quarters.” This type of household is defined as places where individuals live or stay in a group living arrangement owned or managed by an organization that provides housing or services for residents, such as medical care. Group quarters also include places like college residence halls, military barracks, or correctional facilities. Between 2000 and 2010, the number of persons living in group quarters decreased by 50.2 percent, as shown in Table II.11.3.

<b>Group Quarters Population</b>	<b>3,300</b>	<b>1,644</b>	<b>-50.2%</b>

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

<sup>92</sup> In the 2010 Census, “juvenile facilities” and “correctional facilities” were reported separately.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Table II.11.4, shows data on household type by tenure in the 2016 5-year ACS data. Household type is broken down by family households and non-family households. In 2016, there were an estimated 25,233 family households, of which 19,032 housed married couple families and 6,201 housed “other families.” “Other family” is defined as either a male householder with no wife present, of whom there were 1,955 families, or a female householder with no husband present, of which there were 4,246 families. There were also an estimated 12,129 “non-family households,” which refers to households of unrelated people or one person living alone. When compared to the state, the percentage of family households in Laramie County was 67.5 percent, which compared to the statewide rate of 65.2 percent. Of the family households in Laramie County, 75.4 percent were married households, which compared to 79.5 percent in the State of Wyoming.

Table II.11.5, displays the 2016 5-year ACS census data for household type by household size. In 2016, there were 12,715 two-person family households, 4,881 three-person family households and 4,672 four-person family households. One-person non-family households made up 82.4 percent of all non-family households or an estimated 9,994 households. Laramie County’s two person households made up 38.4 percent of total housing units and four person households made up an additional 12.9 percent, which compares to 37.8 and 11.6 percent, respectively, for the State of Wyoming.

 Laramie County  
 1990 – 2016 BLS Data

The BLS produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent only filled jobs, whether full or part-time, temporary or permanent, by place of work the pay period. Data from this series are from the period of January 2010 through June 2017 and are presented in Table II.11.21, with the 2016 information considered preliminary (p). Between 2015 and 2016, total annual employment decreased from 46,123 persons in 2015 to 45,587 in 2016, a change of -1.2. In 2017, preliminary estimates show total monthly employment was 45,919 in June 2017.

The Bureau of Economic Analysis (BEA) measures employment, defined as the total number of full- and part-time jobs by place of work. In 2016, the most recent year for which data are available, Laramie County recorded 66,741 jobs. Total real personal income, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, adjusted for place of residence, was \$4,883,518,000, and real per capita income was \$49,763 in 2016. This compares to a statewide average real per capita income of \$55,116. The average earnings per job in the county was \$52,487 in 2016, while Wyoming average earnings per job was \$52,490. These data are presented in full in **Volume II. Technical Appendix.**

**Housing**

According to the Wyoming cost of living index, real average apartment rent in Laramie County decreased by 1.4 percent from second quarter 2016 to second quarter 2017 from \$793 to \$782. During that same period, detached single-family home rents increased by 0.2 percent, rents for mobile homes on lots increased by 0.3 percent, and rents for mobile home lots increased by 2.7 percent.

Laramie County rental prices experienced average annualized increases of 0.5 percent for apartments, 0.9 percent for houses, 1.5 percent for mobile homes plus a lot, and 1.5 percent for mobile home lots since fourth quarter 1986 through the second quarter 2017. These figures compare to state average annualized increases in rental prices of 0.7 percent for apartments, 1.2 percent for houses, 0.9 percent for mobile homes plus a lot, and 0.9 percent for mobile home lots over that same period. Table II.11.24, presents the Laramie County data for each rental type.

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Laramie increased from 388 authorizations in 2015 to 433 in 2016.

The real value of single-family building permits decreased from \$187,383 in 2015 to \$176,777 in 2016. This compares to an increase in permit value statewide, with values rising from \$353,167 in 2015 to \$353,422 in 2016. Additional details are given in Table II.11.25.

The Wyoming Rental Vacancy Survey (RVS) has been completed biannually since 2000, with the most recent survey conducted in the December 2017.<sup>93</sup> During December 2017, a total of 234 surveys were completed by property managers in Laramie County. Of the 6,928 rental units surveyed, 309 were vacant, indicating a vacancy rate of 4.5 percent, as shown in Table II.11.27, at right. This compares to a 4.3 percent vacancy rate one year ago and a statewide December 2017 vacancy rate of 10.2 percent.

Diagram II.11.4, shows the historical vacancy rate for Laramie County and Wyoming. As can be seen, the vacancy rate in Laramie County was generally lower than the statewide rate over the entire 16 year period.

<sup>93</sup> Those signified as a in the “year” column of Table II.11.27 are conducted in June/July of each year. Those signified as b are conducted each November/December. Conducting the surveys in June and December of each year allows one to view the prospective seasonality of vacancy rates as well as year-to-year changes.

 RVS Data, June 2001 - December 2016

Diagram II.11.5, shows the average rent of single-family and apartment units in Laramie County. In 2017, average rents for single-family units increased to \$1,120 and the average rent for an apartment increased to \$841.

**Diagram II.11.5**  
**Average Rent of Single Family and Apartment Units**  
 Laramie County  
 RVS Data, June 2006 – December 2017

Table II.11.28, shows the amount of total and vacant units by unit type, with their associated vacancy rates. At the time of the survey, there were an estimated 805 single family units in Laramie County, with 46 of them available. This translates into a vacancy rate of 5.7 percent in Laramie County, which compares to a single family vacancy rate of 5.8 percent for the State of Wyoming. There were 2,655 apartment units reported in the survey, with 112 of them available, which resulted in a vacancy rate of 4.2 percent. This compares to a statewide vacancy rate of 9.7 percent for apartment units across the state.

Average market-rate rents by unit type are shown in Table II.11.32. Not all respondents were able to disclose the rental amounts for their units, so there may be some statistical aberrations in the computed rental rates, but generally those units with more bedrooms had higher rents. Single family units also normally command higher rents than apartment units.

<b>Table II.11.32</b>

Table II.11.39, shows the most common answers from the 2017 calendar year Housing Needs Assessment (HNA) Survey. This survey focused on new Wyoming residents and was conducted over the phone using a sample from data provided by the WYDOT. Laramie County had a total of 69 respondents, with an average persons per household of 2.7 people. Of new residents to Laramie County, 48.5 percent were not married and the most common age group arriving in the state was 25 to 34 years old. Most new residents moved to be closer to friends or relatives.

The HNA survey, also asked residents about their current residence. New residents most commonly reported living in a single family home, with 58.0 percent of respondents renting their residence. The average mortgage payment in Laramie County was \$1,227 and the average rent was \$828. When asked if they were satisfied with their current housing, 81.2 percent said they were satisfied with thier current housing.

<b>Table II.11.39 Most Replied Response Laramie County HNA Survey: Calendar Year 2017</b>	
<b>Question</b>	<b>Most Replied Answer (%)</b>
<b>Demographics</b>	
Total Number of Respondents	69
Number of persons in household (Average)	2.7
Current age	25 to 34 years old (26.1%)
Marital status	Not Married (48.5%)
Primary reason for moving to Wyoming	Friends or relatives in Wyoming (24.6%)
In which industry are you primarily employed	Retired (20.6%)
Highest education level completed	High School Diploma/GED (21.7%)
Total household income from all sources	\$50,000 to \$74,999 dollars (18.2%)
<b>Current Housing Characteristics</b>	
Current Residence	Single family home (56.5%)
Do you own or rent	Rent (58.0%)
How many bedrooms (Average)	2.8
How many full bathrooms (Average)	1.8
Average mortgage payment	\$1,227
Average rental payment	\$828
Are you satisfied with your current housing	Satisfied with current housing (81.2%)
<b>Housing Demand (If unsatisfied with current housing)</b>	
Reason you are unsatisfied	Need more bedrooms (44.4%)
Are you seeking to change your housing situation	Seeking different housing (77.8%)
What type of unit are you seeking	Single family home (85.7%)
Type of tenure seeking	Seeking to rent (57.1%)
If own, do you plan on building or buying	Build a new unit (50.0%)
Expected buying price	\$150,000 to \$199,999 dollars (100.0%)
Expected building price	\$150,000 to \$199,999 dollars (100.0%)
Expected rental price	\$401 to \$500 dollars (33.3%)

For residents who are unsatisfied with their current housing, 44.4 percent were unsatisfied because they need more bedrooms. When asked what type of unit they were seeking, the most common response, 85.7 percent, indicated they were seeking a single family home. When asked if they preferred to own or rent, 42.9 percent wanted to buy and 57.1 wanted to rent their next residence. Most residents wishing to buy a house anticipated spending \$150,000 to \$199,999 dollars if they were buying an existing unit, and \$150,000 to \$199,999 dollars if anticipated building a new unit. Of those respondents who wished to rent, the most common response, 33.3 percent of respondents, anticipated spending \$401 to \$500 dollars. Additional survey data are presented in **Volume II. Technical Appendix.**

### Housing Problems

While the ACS data do not report significant details regarding the physical condition of housing units, some information can be derived from data relating to overcrowding, incomplete plumbing or kitchen facilities, and cost burdens.

Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. According to 2016 5-year ACS data, 375 or 1.0 percent of households in Laramie County were overcrowded and another 76 or .2 percent of units were severely overcrowded, as shown in Table II.11.40. This housing problem was far more prevalent in renter households as compared to owner households.

<b>Table II.11.40</b>

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

At the time of the 2016 5-year ACS, a total of 538 units or 1.3 percent of all housing units in Laramie County were lacking complete kitchen facilities. This compared to 2.7 percent of households statewide without complete kitchen facilities. These data are presented in Table II.11.41, at right.

<b>Table II.11.41</b> <b>Housing Units with Incomplete Kitchen Facilities</b> Laramie County 2011-2016 5-Year ACS Data		
<b>Facilities</b>	<b>Laramie County</b>	<b>State of Wyoming</b>

Lacking Complete Kitchen Facilities	538	7,218
<b>Total Housing Units</b>	<b>41,571</b>	<b>267,987</b>
Percent Lacking	1.3%	2.7%

At the time of the 2016 ACS, a total of 516 units or 1.2 percent of all housing units in Laramie County were lacking complete plumbing facilities. This compared to 2.6 percent of households lacking complete plumbing facilities in the State of Wyoming. These data are presented in Table II.11.42.

<b>Table II.11.42</b> <b>Housing Units with Incomplete Plumbing Facilities</b> Laramie County 2011-2016 5-Year ACS Data

<b>Total Households</b>	<b>41,571</b>	<b>267,987</b>
Percent Lacking	1.2%	2.6%

The third type of housing problem reported in the 2016 ACS data is cost burden. Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Laramie County, 17.2 percent of households had a cost burden and 9.9 percent of households had a severe cost burden, which compared to 14.2 percent with a cost burden and 9.6 percent with a severe cost burden in the State of Wyoming. Roughly 17.3 percent of homeowners with a mortgage in Laramie County experienced a cost burden and 6.8 percent experienced a severe cost burden, while 24.8 percent of renters had a cost burden and 17.0 percent had a severe cost burden, as seen in Table II.11.43.

### 2017 Household Forecast

The 2017 Housing Needs Forecast reports housing demand projections from 2017 to 2050, with 2016 as the base year. Three possible economic futures portraying moderate, strong, and very strong growth were used to create three forecasts. The strong scenario is the base case, representing conditions as of today. The moderate growth scenario forecast projects household growth with the assumption of slower population and employment growth, where the very strong growth scenario incorporates assumptions of much stronger employment and population growth over the forecast horizon.

The primary objective of offering three alternative forecasts is to enhance planning capacity and to provide additional tools in order to assist state and local governments in their ongoing housing needs assessment, thereby facilitating informed discussion about housing demand at the local community level. These forecasts prove useful when interpreting the need for new or rehabilitated housing and whether single-family or rental housing activities might be best undertaken.

All three forecasts span the period of 2017 through 2050 and offer predictions of the demand for housing. However, only the strong growth scenario is report here. The moderate and very strong scenarios are reported in the WCDA housing forecast report.

This report uses the modified population projections based on projections released from Woods & Poole Economic, Inc (W&P).

Income categories were calculated using the Housing and Urban Development CHAS (Comprehensive Housing Affordability Strategy) data and are expressed as a percentage of area Median Family Income (MFI).

This distribution is assumed to remain constant over the forecast horizon. Table II.11.44, shows the current CHAS housing problem estimates for the period of 2010-2014. Both the income distribution and the percentage share of households experiencing housing problems were derived from this data and assumed to remain constant throughout the forecast horizon. As can be seen there were a total of 4,925 owner occupied and 4,540 renter occupied households experiencing a housing problem.

Table II.11.45, shows the total estimated housing by tenure for Laramie County. As can be seen, in 2030 there are estimated to be a total of 29,215 owner and 14,005 renter occupied households or a total of 43,220 households. By 2050 there are estimated to be 33,814 owner, 16,092 renter for a total of 49,906 households in Laramie County.

<b>Table II.11.45 Total Estimated Housing Forecast</b> Laramie County Strong Growth Scenario

2050	33,814	16,092	49,906

Table II.11.46, below shows the incremental housing demand for Laramie County. The incremental housing demand estimates the additional housing stock needed above the currently available housing stock. In 2016, the base year, the incremental housing demand is set at zero and all future years show the estimated stock needed in addition to the current housing supply to satisfy future demand.

As can be seen in 2030 an estimated additional 3,625 owner-occupied and 2,233 renter occupied households will be needed above current 2016 housing levels to address future household demand. The incremental housing demand is also reported by income breakdown. In 2050, it is estimated Laramie County will see an additional 12,544 households, of which 1,238 are estimated to have incomes of 0 – 30 percent of Median Family Income (MFI). And additional 2,347 households above current 2016 levels are expected to have incomes of 50.1 to 80.0 percent of MFI.

Table II.11.47 shows the Incremental Total Housing Need Forecast for Laramie County. The incremental total housing need forecast is calculated by adding the incremental housing demand forecast with current un-met housing need. Un-met housing need is defined as any household experiencing a housing problem as defined by HUD. The total housing need shows the broadest measure of future housing need because it takes into account future housing demand as well as the current need among existing housing stock.

In 2016, the base year, the total housing need set at the 9,434 households, which represents all households with an unmet housing need that needs to be addressed, such as cost burden or sub-standard living conditions. In all future years, the incremental housing need forecast shows both existing need and need based on future demand by income. In 2050, there will be an estimated need for 13,180 owner and 8,798 renter occupied households for a total of 21,978 quality households.
